Disposable Paint Spray & Pesticide Respirator

ONE-STEP™ DISPOSABLE RESPIRATOR IS CHOSEN FOR THESE PREMIUM FEATURES

"P" Level non-degrading filter does not require change-out at end of every shift. Reduces use cost by 50-100%.

Full-elastomer nose bridge and softer elastomer for superior wearing comfort.

Rugged, engineering-grade ABS plastic for frame and cartridges provide durability and trouble free use.

Hygiene Guard storage cap keeps respirator clean and prevents damage to the facepiece storage.

Reusable Foil Storage Bag plus individually wrapped respirator help assure best respirator life.

ONE-STEP™ IS CHOSEN BY THE AIR FORCE ONE DETAILING TEAM

Gerson was recognized by the US Air Force One Detailing Team for providing respirator products for their efforts. See this video (link to left) expressing the team's appreciation of our helping to keep them safe and healthy during this project.

GERSON®

Gerson®-brand products are well known and trusted throughout the world.

With the idea of automating the production of a simple disposable paint filter, Louis M. Gerson started business in 1956 in a small auto-repair garage in Boston, Massachusetts.

The principles of automation and innovation upon which Louis Gerson started his small business, are the core values that have driven the Gerson Company in the following sixty-five years.

Today, Gerson® distinguishes itself as a vertically integrated, prime manufacturer of a full range of air-purifying respirators, from filtering facepieces to half-mask to full face respirators, all products of outstanding design and value.

Filtering facepiece respirators for example, such as our various styles of N95 respirators, have been produced in Middleboro, MA since 1985 on unique, high-speed equipment of our own design and construction, incorporating our own melt-blown filter material to provide high-performing filtration with exceedingly comfortable breathing characteristics.

To remain globally competitive, other respiratory products are produced in overseas assembly operations exclusive to Gerson, again using Gerson-owned and designed equipment, as well as our US-made melt blown filters. Middleboro, MA is also the production site of Gerson paint strainers and tack cloths, all produced on our proprietary automated equipment to our exacting quality standards that deliver consistent user value.

The Gerson spirit of over sixty-five years of manufacturing and product innovation remains strong. We are ready to serve your needs.
