

LARGE MAGNETIC BRACKET

Strong magnetic mounting bracket

Extremely powerful magnetic bracket designed for flexible mounting and positioning of the large work lights on any magnetic surface.

The bracket has 2 extremely powerful magnets with a holding force of more than 20 kg each, providing altogether a holding force equivalent to 420N. The magnets are rubber-coated to protect and avoid scratching the surface. To obtain maximum flexibility the magnets are turnable and can be rotated to any desirable position. So, even where the magnetic surface available is limited the flexible mounting bracket can be used.

The simple and one-hand-operated mounting bracket ensures fast and secure installation, and the lamp can be tilted to any position required in the daily work. A built-in stop mechanism avoids the lamp from falling out of the bracket. Press the button to release.

For the minor work lights, we recommend using the small MAGNETIC BRACKET item no. 03.5390 with half the holding force.

The bracket is designed to fit a wide range of SCANGRIP work lights. See complete list on scangrip.com.
