RANGE OF HOMEGROWN TAPES

SEAM SEALING TAPE

Seam Sealing Tape is a reinforced, 1mm thick acrylic tape with high tack and shear strength performance acrylic adhesive. Excellent resistance to moisture, chemical, UV and heat; making the tape bond securely to a wide range of surfaces.

PART NO: BD014 - 6MM X 10M
PART NO: BD015 - 8MM X 10M
PART NO: BD016 - 10MM X 10M

CUSTOMISING TAPE

Customising Tape uses a thermally stabilised PVC backing with a rubber-based pressure sensitive adhesive. The product has 8 strips of pre-cut fine line masking tape - allowing a multitude of curved patterns to be created when customising. It is highly flexible, easy to curve and will hold and cleanly remove from surfaces in temperatures up to 150C/300F for at least 1 hour.

PART NO: BD012
- 12MM X 10M

FOAM TAPE

Foam Masking Tape is designed for masking door apertures to reduce the ingress of paint during the automotive refinishing process. It is perfect for the sealing part of a painting operation and saves you time with no unwanted paint lines.

PART NO: BD010
- 13MM X 50M

STRIPING TAPE

Striping Tape uses a thermally stabilised polypropylene backing with a urethane based pressure sensitive adhesive. The product performs in temperatures up to 138C for at least 45 minutes - leaving a sharp, clean separation line. The product is pre-cut into 8 sections across the roll making it ideal for striping coach lines in a multitude of configurations.

PART NO: BD013
- 25MM X 14M

CLEAR LOGO TAPE

Clear Logo Tape is purposely designed for recovering logos and emblems from all types of vehicles - reducing costs and speeding up the reclaim process. The product is also ideal for positioning parts before final fixing or for fixing decorative and promotional items. The process saves considerable time over other methods and removes the unnecessary use of scissors for cutting around new mounting tape.

PART NO: BD011
- 50MM X 300MM
