

TECHNICAL DATA SHEET

02007 MAGIC CLAY MITT 21CMx15CM

DESCRIPTION:

GLANZLAB MAGIC CLAY MITT can easily remove contaminants accumulated on car paint for a long period of time such as dirt particles, metal particles, industrial, etc. leaving a silky smooth finish immediately. It is easy to make your car's body smooth and shiny. This product is used in automobile paint, automotive glass, and household glass. Product features: deep decontamination, dust flying paint, rust point heavy pollution, insect dead bird droppings, a slight oxide layer, asphalt, etc.

- Quickly and effectively remove surface contaminants
- High-quality materials (moya and microfiber) provide the clay mitt with great tenacity and stickiness.
- Save time and effort of traditional detailing clay
- Result in a silky smooth paint finish

INSTRUCTIONS:

1. Wash away dirt and sand from the car thoroughly. Do not wipe dry.
2. Soak the magic clay cloth mitt completely in water or car wash liquid and gently wipe over the whole car (including the windshield and windows)
3. During use, soak the magic clay cloth again and rinse with water before continuing using to avoid dirt particles from scratching the paint.
4. After wiping over the whole car, rinse the car again with water
5. The whole car should be wiped dry before the waxing begins

NOTE:

1. Do not use it together with a petroleum-based cleaning agent (such as asphalt cleanser or car polish)
2. Wipe gently and do not apply high pressure when using the product to prevent scratching
3. Do not place the product in high temperatures above 40 degrees to cover a long period.

The data, information, and suggestions provided are correct based on our experience; however, we assume no responsibility for the results obtained, as the conditions of use are beyond our control.

4. Avoid under sunny or high temperatures.
5. When the product is found to be severely soiled upon use, replace it immediately to avoid scratching car paint.
6. Wring dry after use and store in original container.
