About Mirka

Mirka Ltd is a family-owned Finnish company and a world leader in abrasives technology innovation. We offer a complete range of technically superior, high quality abrasives, innovatively designed tools, complete sanding systems and supplementary products. This total innovative solution delivers real benefits to customers in terms of speed, first-class efficiency, surface finish quality and cost

effectiveness, even when tackling the most demanding applications.

Mirka is the first company in its sector to obtain the three most important quality standards. The production process guarantees reliable quality by following the ISO 9001 quality assurance system. The ISO 45001 occupational health and safety management system ensures a high level of work safety. The ISO 14001

environmental management system proves that we consider the environment in all our activities.

Corporate Responsibility

CONTINUOUS IMPROVEMENT TOWARDS SUSTAINABILITY.

Changing conditions inspire us to improve and grow our business. We see that our customers are as interested in sustainability as we are. This is why our product development is focused on innovating the best sustainable products and systems, while continually improving our own environmental performance.

Our business is focused on providing the best surface finishing preparation tools and systems to customers. To be the most sustainable finishing systems provider, we are digging deep down to the core of our company to figure out what it really means to be sustainable. We have accomplished a great deal already and have many more

initiatives we will take on in the future.

For people working at Mirka, it has always been clear to not waste financial or material resources – of our own or those of our customers. We find it is equally clear to preserve the planet's resources. Sustainability is a natural extension of this approach. It means taking the economy, the earth, and people into consideration when we make business decisions – now and for future generations.

We are continuously looking for opportunities to reduce our environmental footprint – this aligns with our company values and also cuts costs. We have worked hard to conserve energy and raw materials, reduce waste, increase recycling, and decrease the use of persistent chemicals. We are developing healthier, safer, and

more efficient products and processes so that our customers and employees will benefit. For example, our dust-free sanding systems help protect the lungs of workers while giving a cleaner and better surface finish.

Partner Portal

The Mirka Partner Portal gives you access to information on your orders, invoices and sales as well as the latest product information and news. Our secure site also gives you access to our new Webshop on-line ordering system. For further details or to register, please contact Mirka (UK) Ltd. Please note this is only available to Mirka Distributors.

ABRALON® GRIP DISCS

Abralon®

Abralon® is a unique multifunctional patented sanding material developed for the flexible sanding of both smooth and profiled surfaces.

Abralon creates a smooth sanding pattern on angled surfaces and edges, while minimising the risk of pressure marks. The flexible weave allows water and air to pass freely, making the product suitable for both dry and wet sanding, either by machine or hand. Abralon is also suitable for the finishing and pre-polishing of gelcoat, SMC, glass reinforced plastic (GRP), lacquers, etc.

ABRANET® GRIP DISCS

Abranet®

Abranet® is a revolutionary sanding material for dust-free sanding.

This unique patented sanding material contains thousands of small holes, making it possible to effectively vacuum dust and other particles away without clogging the disc surface. The result is seen as a very uniform sanding pattern and a perfectly smooth surface. Since the amount of airborne dust has been minimised, the work environment is remarkably improved.

Abranet has been developed for sanding filler, primers, lacquers, composite materials and a large amount of other materials.

- Durable long lasting product
- Economical sanding solution

ABRANET® ACE GRIP DISCS

Abranet® Ace

Abranet® Ace is a premium net product with a ceramic grain. The product increases production and speed for tougher, more demanding sanding applications in a variety of industrial sectors, whilst reducing costs.

The improved robust grain prolongs the life and ensures fewer sanding defects and less grain breakage. The tougher nylon backing and heavier velour provides better disc grip adhesion and enhanced edge wear, making Abranet® Ace more effective and longer lasting.

Abranet® Ace also has a highly visible reverse side print pattern making it more user-friendly.

ABRANET® ACE HD GRIP DISCS

Abranet® Ace HD

The latest addition to the net abrasive family, Abranet® Ace HD, is durable and tough with ceramic grains. The strong net structure resists high wear and tear and the ceramic grain offers superior cutting performance on various surfaces. The improved woven mesh backing increases the lifetime of the abrasive, and makes the sanding process faster.

- Resists clogging and delivers long lasting performance
- Excellent durability - retains its high performance sanding properties for far longer, especially on harder applications
- Outstanding performance on demanding applications

ABRANET® SIC NS GRIP DISCS

Abranet® SiC NS

Abranet® SiC NS is a multifunctional net abrasive without stearate, developed mainly for glass sanding, but is also suitable for sanding of other hard surfaces like primers, clear coats and composites.

A combination of high performance and a longer lifespan than traditional abrasives gives a cost-effective solution. The bonding is of resin type, and Abranet SiC NS is coated with a dense, uniform layer of silicon carbide grains.

AUTONET® GRIP DISCS

Autonet®

Autonet® is specially developed to satisfy the unique demands of the automotive refinishing industry. The patented construction consists of a dense network of polyamide fabric threads onto which the abrasive grit is bonded. This new-age surface finishing solution offers speed, excellent efficiency and an amazing dust extraction ability. The jobs get done quicker and with a better surface quality.

Autonet is available in a range of abrasive grits that allows users to benefit across a full spectrum of automotive refinish industry applications.

- Excellent initial aggressivity
- Reduces edge wear in finer grits
- Eliminates clogging and pilling
- Long life-span
- A versatile range to suit any application

COARSE CUT GRIP DISCS

Coarse Cut

Coarse Cut is an aggressive sanding material suitable for sanding lacquer and filler, glass reinforced polyester and welding seams. Coarse Cut is a durable product suitable for all kinds of coarse sanding. This is due to the specially reinforced backing material and Progressive Bond™ dust binding technology developed by Mirka.

GALAXY GRIP DISCS

Galaxy

Mirka's new Galaxy features a new self-sharpening ceramic grain, a clog resistant coating and the new Multifit hole configuration. The ceramic grains of Galaxy are engineered to stay sharp, as new abrasive edges are formed when they break down during the sanding process, enabling Galaxy to continue cutting – from edge to edge. Galaxy utilises Mirka's new Multifit concept for hole configuration. With Multifit, the abrasive can be placed on any machine without the need to specifically align it, thanks to the optimised hole placement.

Technical specifications	
Grain	Ceramic/Aluminium oxide
Bonding	Low VOC resin system
Backing	Polyester film
Coating	Semi-Open
Colour	Blue
Grit range	40 - 2000

GOLD GRIP DISCS

Gold

Gold is a durable product very well suited for sanding at high speeds.

Gold is an all-round sanding material that can be used for many purposes. In order to achieve an optimal sanding result, the semi-open grit binding and special stearate coating are designed to prevent clogging and pill forming.

IRIDIUM GRIP DISCS

Iridium

Iridium is a premium paper abrasive for universal sanding. Perfected for speed and efficiency, it has a mix of ceramic and aluminium oxide grains on a flexible paper with precision coating that prevents clogging and reduces pilling. It practically repels dust and lifetime is increased as the grains stay sharp for longer. Dust extraction is optimised with multihole patterns for discs and strips. Iridium delivers amazing results on both soft and hard surfaces, making it the ideal paper abrasive choice for professionals in any industry.

Technical specifications

Grain	Ceramic/Aluminium oxide
Bonding	Low VOC resin system
Backing	Latex paper, D-paper/ C-paper
Coating	Semi-Open
Colour	Grey
Grit range	80 - 1000

MICROSTAR® GRIP DISCS

Microstar®

Microstar® is designed for keying surfaces and paint rectification of top and clear coat applications. Microstar has a smooth film backing, selected aluminium oxide grains and a special stearate coating as a protective top layer. The Microstar disc lasts longer, does not clog so easily and gives a high quality finish. Microstar is developed for dry sanding only.

Q.SILVER® GRIP DISCS

Q.Silver®

Q.Silver® is an abrasive suitable for aggressive sanding to achieve fast and efficient stock removal. The product possesses high heat endurance and is tough in down-to-metal sanding for example in lacquer sanding. The performance in sanding of hard wood and composites is also extremely good.

The backing consists of a flexible and strong latex paper. Q.Silver is a fully resin bonded product with semi-open grain coating.

SANDY GRIP DISCS

Fixed terms apply. Please contact your Technical Sales Representative for details.

Sandy

Sandy is a durable sanding product with excellent speed of cut and a consistent scratch pattern. The stearate coating is designed to prevent clogging and pilling. The coarser grits are recommended for sanding of filler and removing lacquer, while the finer grits are excellent for dry sanding primed or lacquered surfaces.

ULTIMAX® GRIP DISCS

Ultimax®

Ultimax® is produced using a groundbreaking new production process called 'Selective Coating™ Technology' (patent pending). A series of tiny cavities are especially designed into the abrasive material and these have been optimised to efficiently prevent clogging. This innovative new technology, along with the special abrasive grains that are used, gives a longer product life span and reduces material usage per job. Ultimax is developed for the effective sanding of hard wood surfaces, such as oak and beech.

Strips

ABRANET® GRIP STRIPS

Abranet®

Abranet® is a revolutionary sanding material for dust-free sanding.

This unique patented sanding material contains thousands of small holes, making it possible to effectively vacuum dust and other particles away without clogging the disc surface. The result is seen as a very uniform sanding pattern and a perfectly smooth surface. Since the amount of airborne dust has been minimised, the work environment is remarkably improved.

ABRANET® ACE GRIP STRIPS

Abranet® Ace

Abranet® Ace is a premium net product with a ceramic grain. The product increases production and speed for tougher, more demanding sanding applications in a variety of industrial sectors, whilst reducing costs.

The improved robust grain prolongs the life and ensures fewer sanding defects and less grain breakage. The tougher nylon backing and heavier velour provides better disc grip adhesion and enhanced edge wear, making Abranet® Ace more effective and longer lasting.

ABRANET® ACE HD GRIP STRIPS

Abranet® Ace HD

The latest addition to the net abrasive family, Abranet® Ace HD, is durable and tough with ceramic grains. The strong net structure resists high wear and tear and the ceramic grain offers superior cutting performance on various surfaces. The improved woven mesh backing increases the lifetime of the abrasive, and makes the sanding process faster.

GALAXY GRIP STRIPS

Galaxy

Mirka's new innovative Galaxy abrasive combines effectiveness with long life, thanks to a new self-sharpening ceramic grain, a clog resistant coating and the new Multifit hole configuration. The ceramic grains of Galaxy are engineered to stay sharp, as new abrasive edges are formed when they break down during the sanding process, enabling Galaxy to continue cutting – from edge to edge. The blue ceramic grains retain sharpness exceptionally well, giving Galaxy a long life and a fast cut. The scratch pattern of finer grits is especially easy to polish out.

NEXT GENERATION ABRASIVES

Our next generation abrasives (Iridium, Galaxy, Ultimax® Ligno) are made with the most effective and advanced technology, uniquely used by Mirka. The innovations in the production process use significantly less energy, reduced amounts of hazardous chemicals as well as less production waste.

GOLD STRIPS

Gold

Gold is a durable product very well suited for sanding at high speeds.

Gold is an all-round sanding material that can be used for many purposes. In order to achieve an optimal sanding result, the semi-open grit binding and special stearate coating are designed to prevent clogging and pill forming.

IRIDIUM GRIP STRIPS

Iridium

Iridium is a premium paper abrasive for universal sanding. Perfected for speed and efficiency, it has a mix of ceramic and aluminium oxide grains on a flexible paper with precision coating that prevents clogging and reduces pilling. It practically repels dust and lifetime is increased as the grains stay sharp for longer. Dust extraction is optimised with multihole patterns for discs and strips. Iridium delivers amazing results on both soft and hard surfaces, making it the ideal paper abrasive choice for professionals in any industry.

Q.SILVER® GRIP STRIPS

Q.Silver®

Q.Silver® is an abrasive suitable for aggressive sanding to achieve fast and efficient stock removal. The product possesses high heat endurance and is tough in down-to-metal sanding for example in lacquer sanding. The performance in sanding of hard wood and composites is also extremely good.

Triangles

ABRANET® GRIP TRIANGLES

Abranet®

Abranet® is a revolutionary sanding material for dust-free sanding.

This unique patented sanding material contains thousands of small holes, making it possible to effectively vacuum dust and other particles away without clogging the disc surface. The result is seen as a very uniform sanding pattern and a perfectly smooth surface. Since the amount of airborne dust has been minimised, the work environment is remarkably improved.

Abranet® • 100 x 152 x 152 mm • Grip • For Mirka® DEOS Delta

IRIDIUM GRIP TRIANGLES

Iridium

Iridium is a premium paper abrasive for universal sanding. Perfected for speed and efficiency, it has a mix of ceramic and aluminium oxide grains on a flexible paper with precision coating that prevents clogging and reduces pilling. It practically repels dust and lifetime is increased as the grains stay sharp for longer. Dust extraction is optimised with multihole patterns for discs and strips. Iridium delivers amazing results on both soft and hard surfaces, making it the ideal paper abrasive choice for professionals in any industry.

ABRANET® ACE GRIP ROLLS

Abranet® Ace

Abranet® Ace is a premium net product with a ceramic grain. The product increases production and speed for tougher, more demanding sanding applications in a variety of industrial sectors, whilst reducing costs.

The improved robust grain prolongs the life and ensures fewer sanding defects and less grain breakage. The tougher nylon backing and heavier velour provides better disc grip adhesion and enhanced edge wear, making Abranet® Ace more effective and longer lasting.

Avomax Antistatic

- COMPOSITE
- GRP
- HARD WOOD
- MDF
- PAINT
- SOFT WOOD

Avomax Antistatic is especially developed for the wood working industry. The main applications are pine sanding and other resinous wooden materials. The open coating combined with the smooth surface structure makes the product long lasting and efficient, even when sanding easily clogging materials. Avomax Antistatic is designed for aggressive sanding, stronger bonding and longer life. The full resin bonding and aluminium oxide grain guarantee an excellent performance in industrial applications.

Gold Proflex

Gold Proflex is a stearate coated abrasive paper for dry hand sanding of wood, fillers, paints and lacquers. The backing is latex paper, which provides a desired flexibility and conformity in profile sanding operations as well as on flat surfaces. Due to the anti-slip coating on the reverse, it provides good grip during sanding.

Gold Proflex has aluminium oxide grain, which provides a good cut and an excellent scratch pattern, making it ideal for in-between coats and finishing.

NEXT GENERATION ABRASIVES

Our next generation abrasives (Iridium, Galaxy, Ultimax® Ligno) are made with the most effective and advanced technology, uniquely used by Mirka. The innovations in the production process use significantly less energy, reduced amounts of hazardous chemicals as well as less production waste.

PAPER ROLLS

Galaxy

Mirka's new innovative Galaxy abrasive combines effectiveness with long life, thanks to a new self-sharpening ceramic grain, a clog resistant coating and the new Multifit hole configuration. The ceramic grains of Galaxy are engineered to stay sharp, as new abrasive edges are formed when they break down during the sanding process, enabling Galaxy to continue cutting – from edge to edge. The blue ceramic grains retain sharpness exceptionally well, giving Galaxy a long life and a fast cut. The scratch pattern of finer grits is especially easy to polish out.

Caratflex

Caratflex is a stearate coated abrasive product for dry sanding applications. Caratflex has been developed for hand sanding of wood, sealers, paint and lacquers. The backing consists of a flexible latex paper, which is ideal for profile sanding.

Caratflex has a fine stock removal and the silicon carbide grains provide a uniform scratch pattern. The resin bonding and the stearate coating guarantee a long lifetime.

Gold

Gold is a durable product very well suited for sanding at high speeds.

Gold is an all-round sanding material that can be used for many purposes. In order to achieve an optimal sanding result, the semi-open grit binding and special stearate coating are designed to prevent clogging and pill forming.

Gold Proflex

Gold Proflex is a stearate coated abrasive paper for dry hand sanding of wood, fillers, paints and lacquers. The backing is latex paper, which provides a desired flexibility and conformity in profile sanding operations as well as on flat surfaces. Due to the anti-slip coating on the reverse, it provides good grip during sanding.

Gold Proflex has aluminium oxide grain, which provides a good cut and an excellent scratch pattern, making it ideal for in-between coats and finishing.

HAND PADS

Abralon®

Abralon® is a unique multifunctional patented sanding material developed for the flexible sanding of both smooth and profiled surfaces.

Abralon creates a smooth sanding pattern on angled surfaces and edges, while minimising the risk of pressure marks. The flexible weave allows water and air to pass freely, making the product suitable for both dry and wet sanding, either by machine or hand. Abralon is also suitable for the finishing and pre-polishing of gelcoat, SMC, glass reinforced plastic (GRP), lacquers, etc.

Goldflex Soft

The soft and flexible Goldflex Soft has been developed for sanding profiled surfaces and irregular, difficult-to-reach details by hand. The foam base is grip friendly and applies pressure evenly, which reduces the risk of sanding through the surface. The special stearate coating prevents clogging.

Cutting & Grinding

Cutting and Grinding Wheels From Mirka

Mirka offers a new selection of different cut-off and grinding wheels for cutting and grinding steel, stainless steel and other materials. The renewed range of Mirka and Mirka PRO cutting and grinding wheels now has an even longer service life.

CORDLESS GRINDER

Fixed terms apply. Please contact your Technical Sales Representative for details

Mirka® Cordless Grinder

Product Code	Description	ROQ (Packs)	Pcs/Pack
KIT2329ALMUK	Mirka® ANGOS ARG-B 200 55mm max 12.0v 5.0Ah	1	1
8991100311WB	Mirka® ANGOS ARG-B 200 55mm max 12.0v w/o Batt/Charg	1	1

Fixed terms apply. Please contact your Technical Sales Representative for details.

Mirka® Cordless Grinder Accessories

Product Code	Description	ROQ (Packs)	Pcs/Pack	
8093260210	Quick Disc Holder 25-32 mm, 6x20 mm shaft	1	1	
7565060111	Holder for 50 mm cuttingdisc, 6 mm shaft	1	1	
8991122211	Mirka Intelligent Battery* BPA 11125 max 11.1v 2.5Ah	1	1	
8991122311	Mirka Intelligent Battery* BPA 11150 max 11.1v 5.0Ah	1	1	
8991123011	Battery Charger BCA 108 max 12.0v without power cord	1	1	
8991112411	Power Cord 2.0m for Battery Charger BCA 108	1	1	

Fixed terms apply. Please contact your Technical Sales Representative for details.

* Spare batteries have 1 year warranty (spare batteries will be marked with an 'S' to differentiate them from an original).

Cafro

Hybrid bond **Mirka® Cafro Ultra-Flute** grinding wheel

MAKING HARD EASY

The Mirka® Cafro Ultra-Flute grinding wheel has been developed to ensure superior performance for flute grinding in tungsten carbide. Thanks to its unique features, it is ideal for customers producing large series of tools. It ensures higher feed rate, extraordinary stock removal, consistent quality, and energy efficiency.

► A step ahead in flute grinding

- Superior cutting ability
- Ideal for large series – excellent durability and performance when paired with automatic tool loaders
- Longer dressing intervals
- Greater stock removal in less time – deep depth of cut
- Excellent edge/corner retention
- Single-unit rim and body
- Leaves a fine surface finish
- High efficiency – low energy consumption
- Quiet operation – low vibration and stable power use

PRODUCT RANGE

The Mirka® Cafro range includes a wide selection of quality solutions: from grinding wheels always available off-the-shelf (Stocklist) to those made according to the Customer's specific needs, with the constant support of our experts.

Resin bonded wheels

Resin bonded grinding wheels are offered in a wide assortment, with a wide selection of standard shapes and products. We offer diamond wheels for grinding carbides, cermets, ceramics, graphite, precious stones, sintered materials and many others. CBN wheels are designed for grinding hardened steels, cast iron, stellites, nickel alloys for high temperatures, piston rings for automotive engines,

stainless steels and Ni-Ti alloys for medical use.

We offer a very large resin bond choice, with the Bond System enabling easy orientation and application. The Stocklist program helps to optimize wheels for the most popular operations in tool manufacturing, sharpening, profiling, surface grinding and outer and inner diameter grinding.

MIRKA CAFRO BOND SYSTEM

Wheels from diameter 10 to 900 mm (over diameter 750 mm segmented only)
Mounted points from diameter 2.5 to 20 mm – Available also files, honing stones and pellets

Hybrid wheels

Hybrid wheels are the fastest growing bond family. With specific sintering machinery we develop high quality products with natural or artificial porosity, reaching very high removal rates at optimal conditions.

Dimensions range from 20 mm to 220 mm in diameter, available in all shapes and rim widths for manufacturing carbide and HSS tools with plunge grinding. We offer diamond wheels for efficient

grinding of carbide, cermets, optical glass and electronics manufacturing. CBN wheels are available for grinding HSS and stainless steel rotating tools. We have a wide choice of off-the-shelf products, with the possibility of custom-made and reprofiled wheels to enable complex geometries.

THE FASTEST GROWING BOND FAMILY

Wheels from diameter 20 to 220 mm

Metal bonded wheels

Metal bonded wheels are the best option for high corner retention wheels for profiling. They are available in continuous rim diameter up to 350 mm, and segmented, executed in continuous rim up to 500 mm in diameter.

Metal bonded diamond wheels are for grinding ceramics, graph-

ite, abrasive materials, carbide and dressing VIT wheels. CBN wheels are, for instance, intended for untreated stainless steels for medical use. Metal bonded wheels can be tailored to customer's needs, reprofiled in radius with complex angles and geometries.

EXTREMELY SMALL TIP RADIUS

Wheels from diameter 8 to 500 mm (over diameter 350 mm segmented only)
Mounted points from diameter 2.5 to 25 mm – Honing stones (from 20 to 125 mm length) files and pellets

Vitrified wheels

Vitrified wheels are a growing bond family, as machine development enables higher speeds and higher precision grinding. Grinding speeds can reach 140m/s, with very high material removal while maintaining profile stability.

All vitrified wheels can be dressed in the operating machine, in the way of conventional abrasives. The broad product range includes rim diameters up to 605mm, and segmented continuous rims up to 700 mm in diameter. Vitrified wheels are mainly

special products, with PCD and internal grinding wheels kept in stock. Diamond wheels are manufactured for grinding PCD and PCBN, ceramics and carbide. CBN wheels are for manufacturing auto- motive engine parts, such as camshafts and crankshafts, for hard steel rolls, for jet engine maintenance, for manufacturing HSS tools, outer, inner and surface grinding. Replating service is offered for substituting rims on valuable steel bodies.

FOR HIGHER SPEED & PRECISION GRINDING

Wheels from diameter 10 to 700 mm (over diameter 605 mm segmented only)
Mounted points from diameter 5 to 20 mm

Electroplated wheels

Electroplated wheels cover a very broad wheel range, in segmented or continuous rim, suitable for nonwheel products such as files, dressers, blocks, drivers, spindles and dermatology tools. Grit sizes range from D 30 to D 1152 for diamond and B 46 to B 427 for CBN. We keep electroplated mandrels in DIA and CBN and

pantograph chisel sharpening wheels in stock. We also offer plating and replating services, as well as designing special wheels and plated tools. Steel-bodied items can be replated.

Wheels from diameter 10 to 615 mm
Mounted points from diameter 0.6 to 127 mm
Available also files and adjustable honing stones

PCD and PCBN tools

PCD tool program is directed towards milling carbon fibres in the aircraft industry, aluminium in the automotive industry, and even turning Teflon and aluminium when manufacturing cookware. PCBN tools are used in oil well drilling, in turning drilling crowns made of hard steel, as well as hard

stellite coatings and hardened cast iron in automotive applications. We also offer regrinding and reprofiling as well as special custommade tools.

PCD drills from 1.2 to 16 mm
PCD endmills from 4 to 41 mm
PCD countersinks from 10 to 31.8 mm
Also available inserts, boring tools, anti-wear parts, customized tools

Mirka® Cafro

Bond System

CAFRO

Choosing the ideal wheel for your application has never been so easy

9 bond families for infinite applications.

HARDNESS	09	 <p>METAL Highest edge retention</p>	Hardest bonds, ideal when excellent profile retention and minimum wear are required, even on abrasive materials.
	08	 <p>HYBRID Top performance on CNC machines</p>	Mirka® Cafro Hybrid bonds with natural or induced porosity ensure high performances in carbide tools' construction; they have been optimized both for the profile retention of 11V9 and 12V9 wheels that for high-removal, single-pass creep-feed grinding.
	07	 <p>EDG Optimized for microtools</p>	First developed for micro-tools, those bonds have a continuously expanding application range, thanks to their heat resistance characteristics.
	06	 <p>SUPERFIN Mirror finish surfaces on CNC</p>	One of Mirka® Cafro's success stories: specifically developed for tungsten carbide endmills' and drills' lapping, achieving surface roughness. Ra < 0,05 μ and Rz < 0,4 μ.
	05	 <p>TOP The highest edge retention among the resin bonds</p>	A new family in the Mirka® Cafro Bond System for the best heat transfer from the workpiece, in order to allow corner stability and a reduced cutting pressure.
	04	 <p>PRO Profile holding and removal</p>	This Mirka® Cafro Bond System family allows the best compromise between cutting ability and profile holding, together with a silent grinding.
	03	 <p>CNC High removal on CNC machines</p>	Optimized for applications on CNC machines where high removal rate coupled with profile retention and low absorption are required.
	02	 <p>UNI Universal use on manual machines</p>	A strong free cutting ability allows its use in a wide range of applications: ideal for example for large diameter wheels and centerless grinding.
	01	 <p>DRY Free-cutting for dry grinding</p>	Developed for dry grinding, thanks to its cold cutting ability DRY it is suggested also for applications with large contact areas.

Mirka® Cafro Bond System

Mirka® Cafro BOND SYSTEM is the innovative managing method of Mirka® Cafro's resin bonds: 6 bond families dedicated to specific application fields, each divided in a numeric scale – odd numbers for Diamond and even numbers for CBN – which defines quickly, easily and intuitively the optimized solution to your specific grinding operation.

FEPA

ISO 6106-2005 standard, issued according to FEPA (Federation of European Producers of Abrasives) recommendations

MESH

ANSI B74.16-2002 American standard

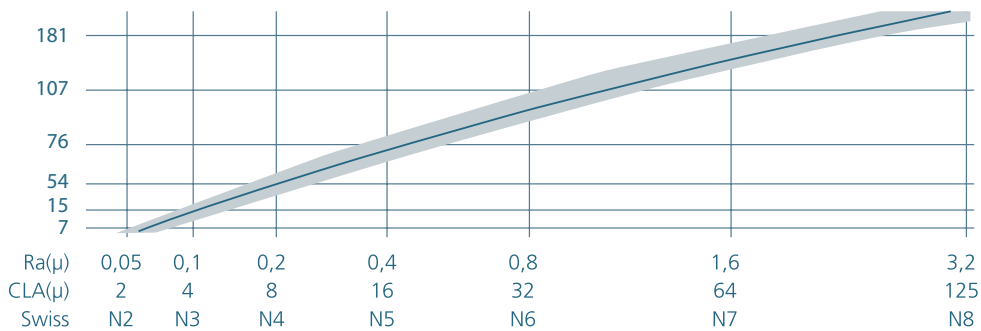

DIN

DIN 848-65 German standard

GRIT SIZE CLASS

An indicative description referred to precision grinding

Grain - Roughness Ratio

Just as an indication, you can find right here a table of the various types of roughness that can be reached on carbide surface grinding (cutting speed approx. 24 m/sec - table speed 15 m/min) coolant: water based emulsion

Abrasive Concentration

The abrasive concentration is expressed in carats / cc, and it stands for the ratio between its weight and the volume of the abrasive conglomerate; the weight of the grit cladding, if present, is not taken into account.

Concentration	35	45	50	68	75	90	100	125	150
Ct/cm ³	1,5	2,0	2,2	3,0	3,3	4,0	4,4	5,5	6,6

WHEEL NAME EXPLANATION

Discover Cafro

Superabrasive products for your precision grinding needs

Mirka® Cafro grinding wheels are exceptionally well suited to machine a wide spectrum of different tool products with great precision.

Discover more.

Inner support rim produced with an innovative resin that wears down alongside the abrasive rim

New lead-free metal alloy

Hybrid bond **Mirka® Cafro E-Cup 11**

MORE PRODUCTION EFFICIENCY, LESS ENVIRONMENTAL IMPACT

Thanks to new materials and manufacturing processes, E-Cup 11 hybrid bond wheels bring improved efficiency to your grinding operations with reduced impact on the environment. Try them today!

▶ IMPROVED EFFICIENCY

The body of the new Mirka® Cafro E-Cup 11 hybrid grinding wheels wears at the same rate as the abrasive rim, so it is no longer necessary to stop the machine, remove the wheel, and re-shape the body. This saves time, increasing overall productivity. Specially-chosen diamond grains and hybrid bond ensure maximum precision while maintaining the profile. In addition, due to the new materials employed, the grinding wheel provides fantastic stability during machine operations

▶ IMPROVED SUSTAINABILITY

Sustainability of processes and products is a key part of Mirka's vision. In the new Mirka® Cafro E-Cup 11 hybrid grinding wheels, we use materials that reduce our impact on the environment. The body is made from a lead-free metal alloy. Eliminating a dangerous pollutant while providing excellent performance. The support rim is made of a special resin that is much more sustainable than other commonly used resins. A step forward in both performance and environmental responsibility

Tools & Equipment

Mirka® AIROS

Robotic Sanding and Polishing

Mirka® AIROS is the first smart electric sander for industrial robots. Designed by dedicated surface finishing professionals, this automated industrial random orbital sander is easy to integrate and suits the requirements of different manufacturing industries.

For further information, please contact your Technical Sales Representative

Mirka® AIROS - sanders and polishers for industrial robots

Mirka® AIROS

– the first smart sander for industrial robots

The Mirka Automated Industrial Random Orbital Sander, Mirka AIROS is an industry first. It is an electric smart sander for industrial robots, built inside a sturdy yet light aluminium housing, featuring an ISO 9409-1 compatible flange for mechanical robot coupling. It can be adapted to fit all mechanical couplings, offering maximum flexibility. The long-life, brushless 48V motor on the AIROS is extra safe for wet sanding, and it runs on constant, configurable RPM.

1 EASY TO INTEGRATE

Mirka® AIROS is light electric sander that is easy to integrate, requiring lower weight handling capacity and saving electricity compared to traditional pneumatic options. Mirka® AIROS is specifically designed for robotic sanding application and build for continuous usage in robotic environment. Mirka® AIROS has standardized connections ensuring faster and easier installation and maintenance, leading less downtime and improved productivity. Mirka® AIROS is equipped with custom flanges for most robot types to offer maximum flexibility by enabling all mechanical couplings from standard ISO to be customised by means of an adapter.

3 MIRKA ECOSYSTEM

Mirka® AIROS is part of the Mirka ecosystem making it the most dependable solution in the market. Mirka solutions consist of sanding heads, controller unit, abrasives (including custom designed for specific requirements) and naturally knowledge and support of true finishing professional through the whole process. Since Mirka® AIROS sanding head is separate from controller unit, parts are easy to replace decreasing downtime and costs.

2 SMART SANDING SOLUTION WITH EXACT RPM MANAGEMENT

Mirka® AIROS has build-in intelligence that allows two way communication between Mirka® AIROS and control system. Full live control of sanding process ensures the consistent quality and enables controller to learn about application and even improve the quality based on logged data. Additionally smart electric sanding solution enables full control over RPM that can be configured according the needs of different phases of process. Content RPM ensures the consistent quality level that is always reproducible even under higher loads.

4 DUST & WATER PROOF ELECTRIC SANDER

Mirka® AIROS is IP66 classified electric sander suitable for all sanding applications, even wet sanding and safe usage on hazardous materials. Dust and waterproof design of Mirka® AIROS combined with rigid and robust an aluminium housing ensure longer lifetime and safer operations. No lubrication oil needed.

Build Your Own System

- Tailor to your business needs

1 Choose communication integration

- Profinet
- Modbus
- Digital

2 Decide your sanding process

By deciding what surface you're looking to sand and what finish you're looking to achieve will help you determine which sanding or polishing head you will require.

3 Accessories selection

The previous step will also help you to identify any accessories you may need, such as: choosing the correct interface pad for sanding curved or profiled surfaces.

4 Abrasive/Polish selection

We have a wide range of sanding and polishing products to choose from depending on your needs. Such as our pioneering net abrasive Abranet for dust free sanding.

AUTOMATION

Mirka® AIROS 300P Robotic Polishing Solutions

The Mirka® AIROS 300P is the latest addition to the company's automation range and the first of Mirka's robotic tools to offer rotary polishing. The AIROS 300P is a durable polisher with a 77 mm pad and an ISO 9409-1 compatible flange for mechanical robot coupling. It's an appliance that enables efficient precision surface polishing for modern automation solutions.

Dedicated to the finish.

Mirka® AutoChanger Redefining Industrial Sanding

In industrial and robotic applications, flawless sanding results are an integral part of the process. This means changing abrasives must be a smooth procedure with no margin for error. Mirka has developed a special AutoChanger system for instant replacement of Mirka abrasive discs in an automated sanding process, to work together with Mirka® AIROS 650S and AIROS 350S sanding heads.

Dedicated to the finish.

Responsible

Creating a positive impact

Environmental responsibility is a natural part of Mirka's process. Our commitment is to encourage a better world. Our tools and abrasives are designed to be long-lasting and sustainable by reducing waste and providing a more environmentally-friendly working environment. By driving innovation, our objective is to make production safer, cleaner and smarter, which makes economic, social and environmental sense.

MIRKA

NEW

Mirka® DEOS II Delta Closer. For perfection.

A flawless surface from corner to corner. The new Mirka® DEOS Delta 663CV Delta makes it possible, faster and easier than ever before. Sand without strain, even when reaching overhead, as the DEOS® Delta weighs less than 1 kg. Reach comfortably into tight spaces with a sander that is just 10 cm high. Sanding is 50% more effective* thanks to the powerful brushless motor and 3 mm orbit. The integrated vibration sensor and Bluetooth connectivity gives you vibration, speed and usage data. Faster and easier sanding is just around the corner.

*Compared to main competitor delta sanders.

Mirka® FBS-B Cordless File Belt Sander.

The Mirka® FBS-B battery file belt sander is designed for panel beating and body repairs, for cleaning up welding seams and spot welds in collision repair as well as vehicle manufacturing and restoration. Lightweight and easy to adjust, the ergonomic design gives the operator complete freedom to reach difficult spots without restriction from cables or hoses.

Cordless convenience for grinding spot welds and seams.

MIRKA

Mirka® Cordless

Mirka cordless sanders.

As with all Mirka machines, the ergonomic design has been a priority to ensure that the light tool can comfortably be used for long periods without fatigue. These cordless sanders enable a long working time as the battery lasts up to 16 hours in industrial use. The lithium-ion battery charges in only 45 minutes.

Mirka® AROS-B – Battery driven.

DISCOVER ESSENTIALS

Mirka Essentials consists of supplies and accessories considered essential in paint refinishing, polishing and other surface finishing work.

Mirka Essentials comprises a suite of products that are considered the best quality and the best companion to other Mirka finishing products and tools. In the Essentials product range, you will find masking tapes, masking films, paint mixing supplies and other materials that are required in preparation.

A professional finish already starts at the preparation stage. With Mirka Essentials there is no oversight in any part of the process for the best possible finish.

MIRKA

Mirka® LEROS

180° flexibility. 100% comfort.

Brushless motor technology - Enables compact design and eliminates the need to change carbon brushes. Helps to maintain a constant speed under load.

180° flexibility in the sanding head - Improves the ergonomics.

5mm random orbit movement - Creates a great surface finish and is much easier to operate compared to rotary sanders.

Dual suction points - Improves the dust extraction.

Only 3.5 kg - The lightest orbital wall sander on the market is easier to use and improves ergonomics.

Now available in a shorter version - LEROS-S

Mirka® LEROS - Pure innovation.

MIRKA**NEW**

Mirka® DEXOS

The All New Dust Extractor

Mirka® DEXOS is a completely new dust extractor with a compact, ergonomic, and user-friendly design. Designed from the ground up to be part of Mirka's next generation of power tools, the DEXOS® is an M class extractor with numerous clever touches to make sanding easier and efficient for the operator.

Also available to purchase is a Bluetooth-enabled remote control which senses tool vibrations to start the extractor.

Mirka® Dust Extractors - don't let the dust haunt you.

Mirka (UK) Ltd Dust Extractor Disclaimer

It is the responsibility of the purchasing customer to ensure that any dust extractor is suitable for the type of dust being collected. Mirka (UK) Ltd does not and will not recommend a dust extractor to customers. All brochures, catalogues, descriptions and other promotional materials are to be treated as illustrative only and are not intended to amount to advice or recommendation on which a customer should rely. Mirka (UK) Ltd recommends a full risk assessment is carried out by an independent third party professional or specialist to ensure any dust extractor is fit for the purpose intended by a customer before they make a purchase. If the dual vacuum kit is used on an M class dust extractor, the dust extractor cannot be used in applications where M class is required. In no event will Mirka (UK) Ltd be liable for any loss or damage as a result of a customer using a Mirka dust extractor. This disclaimer supplements Mirka (UK) Ltd's Terms of Sale.

Mirka® PROS | ROS | OS CV

Decosander®

Hand Sanding Blocks

4m hose for electric sanders (MIN6519411)

10m hose with integrated pneumatics (8992514711)

HOSES AND ADAPTORS

Adapter	Description
 8999804111*	1 Hose Ø 27 mm x 0.5 m + Connector. This conductive adapter enables a quick change in-between Mirka power tools. Fix the adapter on each tool and connect/disconnect to/from any Mirka hose assembly with a Mirka branded adapter, both pneumatic: 8992514511 and 8992514711.
 8992515811*	2 a Mirka Connector for Air + Electric Hoses. Comes with hose 8992514511 and 8992514711.
 8992515911*	2 b Connector for Air + Electric Hoses with threads. This adapter is close to the dust extractor, where the pneumatic tube/electrical cable comes out. Comes with hose 8992514511 and 8992514711.
 8992515611*	3 Hose adapter Ø 32 mm / 54 mm for Mirka® Dust Extractors. Comes with hose MIN6519411, MIN6519211, 8992514511 and 8992514711. This adapter goes from the hose into the dust extractor.
 8391111111*	5 Adapter Ø 20 mm / 28 mm for Mirka® Hand Sanding Blocks. Enables using the Ø 27 mm hoses (MIN6519411 and MIN6519211) together with the blocks.
 8992515411*	6 Soft Connector Ø 25.4 mm. Delivered together with hose MIN6519411 and MIN6519211. Enables connecting MIN6519411 and MIN6519211 hoses to Mirka Decosander®, Mirka Dust Suction Hood and sanders of other brands. Note! Not suitable for Mirka® CEROS or Mirka® ROS.
 MIE6511111	7 Quick connector Ø 25.4 mm. Delivered together with hose MIN6519411 and MIN6519211. Enables connecting MIN6519411 and MIN6519211 hoses to Mirka DEROS, DEOS, LEROS and Dust Suction Hood. Note! Not suitable for Mirka® CEROS or Mirka® ROS.
 8993022011	8 Hose Swivel Connector Ø 20 mm / 20 mm. Enables connecting two Ø 20 mm hoses. For example: 2 x Ø 20 mm hose x 4 m hose (8391112011).
 8393001511*	10 Adapter Ø 30–48 mm for Dust Extractor. Can be cut to fit dust extractors of other brands.
 8391111211	13 Connector Air Inlet for Hand Sanding Block 20 / 20 mm. When fixed on a Mirka 20 mm dust extraction hose, this new connector enables a quick and smooth change of the hose from one Mirka hand sanding block to another. This connector enables adjusting the airflow.
 MIE6515911	14 Mirka Sleeve for Hose and Cable 35 m

Polishing

POLARSHINE® POLISHING PRODUCTS

Polishing guidelines

Use recommended pad and compound combination for best result.
 Recommended polishing speed 1,200–2,000 rpm.
 Spread compound on a sufficiently small area.
 Let the polish and the weight of the buffer do most of the work.
 Keep the pads clean, a dirty pad will cause scratches.
 To avoid overheating and to achieve an even finish, keep the buffer in motion.

To optimise the lifetime of the pads, clean regularly with water.

Water can be used as a cooler and lubricator during the polishing process.

Keep the compound from drying while polishing; dry compound can burn the surface.

Directions for use

Apply pad

Shake well before use

Apply polish to pad or paint surface

Spread compound and polish at 1,200–2,000 rpm

Clean the surface

Silicone free

Keep out of reach of children

Recommended storage temperature

Do not polish in direct sunlight

Keep from freezing

MIRKA

NEW

Mirka® POLAROS

A New Take on Polishing

The POLAROS® RP 600 is a 150 mm rotary polisher that elevates all aspects of polishing. Its ergonomic design, low noise level, and patent-pending Ramp Up and Ramp Down functions come together to make the POLAROS® RP 600 the preferred choice for professionals.

For further information or to arrange a demonstration, please contact Customer Services on 01908 866100.

Mirka® POLAROS - Harness the power of modern polishing.

Cordless is more

Mirka cordless tools are light and ergonomic, with optimal torque and speed thanks to powerful brushless motors. Energy-efficient and quick-charging batteries make the tools economic to use.

With smart Bluetooth technology and an integrated vibration sensor you can monitor vibration levels while sanding. Thanks to rpm range management and auto-stop functions (in-app purchases), you can standardise your spot repair process and achieve the best results every time.

Mirka (UK) Ltd Dust Extractor Disclaimer

It is the responsibility of the purchasing customer to ensure that any dust extractor is suitable for the type of dust being collected. Mirka (UK) Ltd does not and will not recommend a dust extractor to customers. All brochures, catalogues, descriptions and other promotional materials are to be treated as illustrative only and are not intended to amount to advice or recommendation on which a customer should rely. Mirka (UK) Ltd recommends a full risk assessment is carried out by an independent third party professional or specialist to ensure any dust extractor is fit for the purpose intended by a customer before they make a purchase. If the dual vacuum kit is used on an M class dust extractor, the dust extractor cannot be used in applications where M class is required. In no event will Mirka (UK) Ltd be liable for any loss or damage as a result of a customer using a Mirka dust extractor. This disclaimer supplements Mirka (UK) Ltd's Terms of Sale.

Input	100 - 240 VDC, 50/60 Hz	Type	Rechargeable Li-ion 31NR19/65	Rechargeable Li-ion 31NR19/65-2
Charge time	< 40 min (2.0 Ah)	Battery Voltage	max 12.0v	max 12.0v
Storage Temp Range	-20 C .. 80 C	Capacity	2.5 Ah 27.0 Wh	5.0 Ah 54.0 Wh
Charging Temp	-0 C ... 40 C	Net Weight	0.19 kg	0.42 kg
Dimension	191 x 102 x 86 mm			
Net Weight	0.60 kg			

Mirka® POLAROS Technical Information

Model	POLAROS RP 600
Code	MRP6002100UK
Voltage	220 - 240 v
Power Consumption	750w
Speed	700 - 2500 rpm
Size of backing pad	135 mm
Weight	1.7 kg
Sound pressure level (LpA)	57.5 dBa
Sound power level (LwA)	65.5 dBa
Vibration emission value (Rear gripping surface)	1.1 m/s ²
Vibration emission value (Front gripping surface)	0.7 m/s ²

TECHNICAL DETAILS

Mirka® Air Polishers Technical Details

Model	AP 300NV	RPS 300CV
Code	8992340311	8992340111
Size	77mm	77mm
Speed	3,200 rpm	3,000 rpm
Air Consumption	626 l/min	481 l/min
Working Pressure	6.2 bar	6.2 bar
Noise Level	76 dBa	78 dBa
Power	298 w	209 w
Vibration	1.34 m/s ²	2.86 m/s ²
Weight	0.66 kg	0.63 kg
Backing Pad	8294791311	8294791211

Mirka® Electric Polishers Technical Details

Model	PS1437
Code	8991300111UK
Voltage	230v
Power Consumption	1400w
Speed	1100-3700 rpm
Thread	M14
Noise level	84 dBa
Vibration	3.0 m/s ²
Weight	1.9 kg

TERMS AND CONDITIONS

Prices and descriptions are correct at the time of publication, however these may be reviewed at any time and are subject to change without notice. Mirka reserves the right to change the status of products from/to standard stock without notice. All prices are exclusive of VAT and are subject to changes external to Mirka's control. E&OE. Due to the printing processes used the colours shown may vary from the actual item. Minimum order is £350 + VAT. Delivery via distribution only. Standard Terms of Sale apply unless otherwise stated.

This document is the property of Mirka and may not be reproduced in whole or in part without its consent. Prices and descriptions are given for the sole purpose of giving an approximate idea of Mirka's range of products and are provided "as is" for this purpose. Neither prices and descriptions nor this document shall constitute an offer to supply products. Particular products and/or sales channels may, at Mirka's election, be reserved to Mirka for the purposes of sale to particular customers. In addition or alternatively, particular products may be subject to resale terms set forth by Mirka from time to time including, without limitation, where products are contained within a kit, that the individual products within that kit cannot be resold separately.

Items in blue are only available from stock in Finland and are subject to a lead time of 5 – 7 days.

Terms of Sale

Mirka (UK) Ltd's terms of sale (together with its online reseller policy, dust extractor disclaimer and any other policies from time to time, which appear or will appear on its website and which supplement its terms of sale) apply to all sales of goods by Mirka (UK) Ltd. These documents can be viewed at www.mirka.co.uk under the "Company - Policies & Certificates" section and they form part of the contract for the sale of any goods by Mirka (UK) Ltd. An acceptance of a Mirka (UK) Ltd quotation or an order to Mirka (UK) Ltd is an offer to purchase goods on Mirka (UK) Ltd's terms of sale. No contract for the sale of any goods will come into existence until Mirka (UK) Ltd has issued a written acknowledgment or confirmation of order. Such terms of sale provide, without limitation, for the following and your particular attention is drawn to the following:

1. Unless otherwise agreed in writing, all prices given are on an ex works basis from Mirka (UK) Ltd's premises. Where goods are supplied for export from the United Kingdom, unless otherwise agreed in writing, goods shall be delivered fob the air or sea port of shipment.
2. By way of a minimum purchase amount, the buyer shall purchase goods from Mirka (UK) Ltd of not less than any quantity set by Mirka (UK) Ltd.
3. Time for payment shall be of the essence.
4. Any dates quoted for delivery of goods are approximate only and Mirka (UK) Ltd shall not be liable for any delay in delivery howsoever caused. Time of delivery shall not be of the essence.
5. Risk of damage to or loss of goods shall pass to the buyer on delivery.
6. Property in goods shall not pass to the buyer until Mirka (UK) Ltd has received cleared payment in full for the price of those goods and all other goods agreed to be sold for which payment is due.
7. Except in respect of any matter in respect of which it would be unlawful for it to exclude or limit its liability, the entire liability of Mirka (UK) Ltd under or in connection with any contract for the sale of goods shall not exceed the price of goods supplied.
8. The terms of each contract for the sale of goods shall be governed by the laws of England and the buyer agrees to submit to the exclusive jurisdiction of the English courts.
