About Mirka

Mirka Ltd is a family-owned Finnish company and a world leader in abrasives technology innovation. We offer a complete range of technically superior, high quality abrasives, innovatively designed tools, complete sanding systems and supplementary products. This total innovative solution delivers real benefits to customers in terms of speed, first-class efficiency, surface finish quality and cost

effectiveness, even when tackling the most demanding applications.

Mirka is the first company in its sector to obtain the three most important quality standards. The production process guarantees reliable quality by following the ISO 9001 quality assurance system. The ISO 45001 occupational health and safety management system ensures a high level of work safety. The ISO 14001

environmental management system proves that we consider the environment in all our activities.

Corporate Responsibility

CONTINUOUS IMPROVEMENT TOWARDS SUSTAINABILITY.

Changing conditions inspire us to improve and grow our business. We see that our customers are as interested in sustainability as we are. This is why our product development is focused on innovating the best sustainable products and systems, while continually improving our own environmental performance.

Our business is focused on providing the best surface finishing preparation tools and systems to customers. To be the most sustainable finishing systems provider, we are digging deep down to the core of our company to figure out what it really means to be sustainable. We have accomplished a great deal already and have many more

initiatives we will take on in the future.

For people working at Mirka, it has always been clear to not waste financial or material resources – of our own or those of our customers. We find it is equally clear to preserve the planet's resources. Sustainability is a natural extension of this approach. It means taking the economy, the earth, and people into consideration when we make business decisions – now and for future generations.

We are continuously looking for opportunities to reduce our environmental footprint – this aligns with our company values and also cuts costs. We have worked hard to conserve energy and raw materials, reduce waste, increase recycling, and decrease the use of persistent chemicals. We are developing healthier, safer, and

more efficient products and processes so that our customers and employees will benefit. For example, our dust-free sanding systems help protect the lungs of workers while giving a cleaner and better surface finish.

Partner Portal

The Mirka Partner Portal gives you access to information on your orders, invoices and sales as well as the latest product information and news. Our secure site also gives you access to our new Webshop on-line ordering system. For further details or to register, please contact Mirka (UK) Ltd. Please note this is only available to Mirka Distributors.

ABRALON® GRIP DISCS

Abralon®

Abralon® is a unique multifunctional patented sanding material developed for the flexible sanding of both smooth and profiled surfaces.

Abralon creates a smooth sanding pattern on angled surfaces and edges, while minimising the risk of pressure marks. The flexible weave allows water and air to pass freely, making the product suitable for both dry and wet sanding, either by machine or hand. Abralon is also suitable for the finishing and pre-polishing of gelcoat, SMC, glass reinforced plastic (GRP), lacquers, etc.

ABRANET® ACE GRIP DISCS

Abranet® Ace

Abranet® Ace is a premium net product with a ceramic grain. The product increases production and speed for tougher, more demanding sanding applications in a variety of industrial sectors, whilst reducing costs.

The improved robust grain prolongs the life and ensures fewer sanding defects and less grain breakage. The tougher nylon backing and heavier velour provides better disc grip adhesion and enhanced edge wear, making Abranet® Ace more effective and longer lasting.

Abranet® Ace also has a highly visible reverse side print pattern making it more user-friendly.

ABRANET® ACE HD GRIP DISCS

Abranet® Ace HD

The latest addition to the net abrasive family, Abranet® Ace HD, is durable and tough with ceramic grains. The strong net structure resists high wear and tear and the ceramic grain offers superior cutting performance on various surfaces. The improved woven mesh backing increases the lifetime of the abrasive, and makes the sanding process faster.

- Resists clogging and delivers long lasting performance
- Excellent durability - retains its high performance sanding properties for far longer, especially on harder applications
- Outstanding performance on demanding applications

GALAXY GRIP DISCS

Galaxy

Mirka's new Galaxy features a new self-sharpening ceramic grain, a clog resistant coating and the new Multifit hole configuration. The ceramic grains of Galaxy are engineered to stay sharp, as new abrasive edges are formed when they break down during the sanding process, enabling Galaxy to continue cutting – from edge to edge. Galaxy utilises Mirka's new Multifit concept for hole configuration. With Multifit, the abrasive can be placed on any machine without the need to specifically align it, thanks to the optimised hole placement.

GOLD GRIP DISCS

Gold

Gold is a durable product very well suited for sanding at high speeds.

Gold is an all-round sanding material that can be used for many purposes. In order to achieve an optimal sanding result, the semi-open grit binding and special stearate coating are designed to prevent clogging and pill forming.

IRIDIUM GRIP DISCS

Iridium

Iridium is a premium paper abrasive for universal sanding. Perfected for speed and efficiency, it has a mix of ceramic and aluminium oxide grains on a flexible paper with precision coating that prevents clogging and reduces pilling. It practically repels dust and lifetime is increased as the grains stay sharp for longer. Dust extraction is optimised with multihole patterns for discs and strips. Iridium delivers amazing results on both soft and hard surfaces, making it the ideal paper abrasive choice for professionals in any industry.

Technical specifications

Grain	Ceramic/Aluminium oxide
Bonding	Low VOC resin system
Backing	Latex paper, D-paper/ C-paper
Coating	Semi-Open
Colour	Grey
Grit range	80 - 1000

MICROSTAR® GRIP DISCS

Microstar®

Microstar® is designed for keying surfaces and paint rectification of top and clear coat applications. Microstar has a smooth film backing, selected aluminium oxide grains and a special stearate coating as a protective top layer. The Microstar disc lasts longer, does not clog so easily and gives a high quality finish. Microstar is developed for dry sanding only.

Q.SILVER® GRIP DISCS

Q.Silver®

Q.Silver® is an abrasive suitable for aggressive sanding to achieve fast and efficient stock removal. The product possesses high heat endurance and is tough in down-to-metal sanding for example in lacquer sanding. The performance in sanding of hard wood and composites is also extremely good.

The backing consists of a flexible and strong latex paper. Q.Silver is a fully resin bonded product with semi-open grain coating.

ULTIMAX[®] GRIP DISCS

Ultimax[®]

HARD
WOOD

MDF

SOLID
SURFACE

Ultimax[®] is produced using a groundbreaking new production process called 'Selective Coating™ Technology' (patent pending). A series of tiny cavities are especially designed into the abrasive material and these have been optimised to efficiently prevent clogging. This innovative new technology, along with the special abrasive grains that are used, gives a longer product life span and reduces material usage per job. Ultimax is developed for the effective sanding of hard wood surfaces, such as oak and beech.

ULTIMAX® LIGNO GRIP DISCS

Ultimax® Ligno

Ultimax® Ligno is developed purely for the woodworking sector, designed with an 'hourglass' pattern which demonstrates unparalleled performance and effectiveness on wood substrates to ensure optimal material removal, surface finish quality and durability, and sustainability. Ultimax® Ligno combines innovation with robust consideration for the environment. The production method reduces energy consumption as the process for curing the glue is more efficient.

NEXT GENERATION ABRASIVES

Our next generation abrasives (Iridium, Galaxy, Ultimax® Ligno) are made with the most effective and advanced technology, uniquely used by Mirka. The innovations in the production process use significantly less energy, reduced amounts of hazardous chemicals as well as less production waste.

FOAM BACKED GRIP DISCS

Gold Soft

- COMPOSITE
- HARD WOOD
- LACQUER
- PAINT

Gold Soft is a sanding disc with a foam backing. The semi-open grain gives a good cutting performance and is less likely to clog.

The soft backing gives an excellent paint finish, and the softer disc edge eliminates damages on profile sanding.

Gold Soft • Foam Backed Discs • 150 mm • 15 Holes • Grip

ASSORTED DISCS

Mirlon

Mirlon is a flexible, three-dimensional fibre sanding material that provides an excellent surface finish. Due to its special structure, Mirlon is easy to use on profiled surfaces. It is suitable for keying surfaces and creates an excellent base for the next lacquer layer.

Mirlon • 150 mm

Strips

ABRANET® GRIP STRIPS

Abranet®

Abranet® is a revolutionary sanding material for dust-free sanding.

This unique patented sanding material contains thousands of small holes, making it possible to effectively vacuum dust and other particles away without clogging the disc surface. The result is seen as a very uniform sanding pattern and a perfectly smooth surface. Since the amount of airborne dust has been minimised, the work environment is remarkably improved.

ABRANET® ACE GRIP STRIPS

Abranet® Ace

Abranet® Ace is a premium net product with a ceramic grain. The product increases production and speed for tougher, more demanding sanding applications in a variety of industrial sectors, whilst reducing costs.

The improved robust grain prolongs the life and ensures fewer sanding defects and less grain breakage. The tougher nylon backing and heavier velour provides better disc grip adhesion and enhanced edge wear, making Abranet® Ace more effective and longer lasting.

ABRANET® ACE HD GRIP STRIPS

Abranet® Ace HD

The latest addition to the net abrasive family, Abranet® Ace HD, is durable and tough with ceramic grains. The strong net structure resists high wear and tear and the ceramic grain offers superior cutting performance on various surfaces. The improved woven mesh backing increases the lifetime of the abrasive, and makes the sanding process faster.

GALAXY GRIP STRIPS

Galaxy

Mirka's new innovative Galaxy abrasive combines effectiveness with long life, thanks to a new self-sharpening ceramic grain, a clog resistant coating and the new Multifit hole configuration. The ceramic grains of Galaxy are engineered to stay sharp, as new abrasive edges are formed when they break down during the sanding process, enabling Galaxy to continue cutting – from edge to edge. The blue ceramic grains retain sharpness exceptionally well, giving Galaxy a long life and a fast cut. The scratch pattern of finer grits is especially easy to polish out.

NEXT GENERATION ABRASIVES

Our next generation abrasives (Iridium, Galaxy, Ultimax® Ligno) are made with the most effective and advanced technology, uniquely used by Mirka. The innovations in the production process use significantly less energy, reduced amounts of hazardous chemicals as well as less production waste.

GOLD STRIPS

Gold

Gold is a durable product very well suited for sanding at high speeds.

Gold is an all-round sanding material that can be used for many purposes. In order to achieve an optimal sanding result, the semi-open grit binding and special stearate coating are designed to prevent clogging and pill forming.

IRIDIUM GRIP STRIPS

Iridium

Iridium is a premium paper abrasive for universal sanding. Perfected for speed and efficiency, it has a mix of ceramic and aluminium oxide grains on a flexible paper with precision coating that prevents clogging and reduces pilling. It practically repels dust and lifetime is increased as the grains stay sharp for longer. Dust extraction is optimised with multihole patterns for discs and strips. Iridium delivers amazing results on both soft and hard surfaces, making it the ideal paper abrasive choice for professionals in any industry.

NEXT GENERATION ABRASIVES

Our next generation abrasives (Iridium, Galaxy, Ultimax® Ligno) are made with the most effective and advanced technology, uniquely used by Mirka. The innovations in the production process use significantly less energy, reduced amounts of hazardous chemicals as well as less production waste.

Triangles

ABRANET® GRIP TRIANGLES

Abranet®

Abranet® is a revolutionary sanding material for dust-free sanding.

This unique patented sanding material contains thousands of small holes, making it possible to effectively vacuum dust and other particles away without clogging the disc surface. The result is seen as a very uniform sanding pattern and a perfectly smooth surface. Since the amount of airborne dust has been minimised, the work environment is remarkably improved.

Abranet® • 100 x 152 x 152 mm • Grip • For DEOS® Delta

IRIDIUM GRIP TRIANGLES

Iridium

Iridium is a premium paper abrasive for universal sanding. Perfected for speed and efficiency, it has a mix of ceramic and aluminium oxide grains on a flexible paper with precision coating that prevents clogging and reduces pilling. It practically repels dust and lifetime is increased as the grains stay sharp for longer. Dust extraction is optimised with multihole patterns for discs and strips. Iridium delivers amazing results on both soft and hard surfaces, making it the ideal paper abrasive choice for professionals in any industry.

Rolls

ABRANET® ACE GRIP ROLLS

Abranet® Ace

Abranet® Ace is a premium net product with a ceramic grain. The product increases production and speed for tougher, more demanding sanding applications in a variety of industrial sectors, whilst reducing costs.

The improved robust grain prolongs the life and ensures fewer sanding defects and less grain breakage. The tougher nylon backing and heavier velour provides better disc grip adhesion and enhanced edge wear, making Abranet® Ace more effective and longer lasting.

Avomax Antistatic

Avomax Antistatic is especially developed for the wood working industry. The main applications are pine sanding and other resinous wooden materials. The open coating combined with the smooth surface structure makes the product long lasting and efficient, even when sanding easily clogging materials. Avomax Antistatic is designed for aggressive sanding, stronger bonding and longer life. The full resin bonding and aluminium oxide grain guarantee an excellent performance in industrial applications.

Gold Proflex

Gold Proflex is a stearate coated abrasive paper for dry hand sanding of wood, fillers, paints and lacquers. The backing is latex paper, which provides a desired flexibility and conformity in profile sanding operations as well as on flat surfaces. Due to the anti-slip coating on the reverse, it provides good grip during sanding.

Gold Proflex has aluminium oxide grain, which provides a good cut and an excellent scratch pattern, making it ideal for in-between coats and finishing.

Caratflex

Caratflex is a stearate coated abrasive product for dry sanding applications. Caratflex has been developed for hand sanding of wood, sealers, paint and lacquers. The backing consists of a flexible latex paper, which is ideal for profile sanding.

Caratflex has a fine stock removal and the silicon carbide grains provide a uniform scratch pattern. The resin bonding and the stearate coating guarantee a long lifetime.

SHEETS

Gold

Gold is a durable product very well suited for sanding at high speeds.

Gold is an all-round sanding material that can be used for many purposes. In order to achieve an optimal sanding result, the semi-open grit binding and special stearate coating are designed to prevent clogging and pill forming.

Gold • 230 x 280 mm • Abrasive Paper Sheet

Gold Proflex

Gold Proflex is a stearate coated abrasive paper for dry hand sanding of wood, fillers, paints and lacquers. The backing is latex paper, which provides a desired flexibility and conformity in profile sanding operations as well as on flat surfaces. Due to the anti-slip coating on the reverse, it provides good grip during sanding.

Gold Proflex has aluminium oxide grain, which provides a good cut and an excellent scratch pattern, making it ideal for in-between coats and finishing.

HAND PADS

Abralon®

Abralon® is a unique multifunctional patented sanding material developed for the flexible sanding of both smooth and profiled surfaces.

Abralon creates a smooth sanding pattern on angled surfaces and edges, while minimising the risk of pressure marks. The flexible weave allows water and air to pass freely, making the product suitable for both dry and wet sanding, either by machine or hand. Abralon is also suitable for the finishing and pre-polishing of gelcoat, SMC, glass reinforced plastic (GRP), lacquers, etc.

Belts

Narrow and Wide Belt Experts

– Choose the right belt for your surface

When sanding with a belts, many things must be considered to get the best result and the highest possible efficiency. The choice of sanding material, for example, is critical, but other factors such as adjustment of sanding unit, sanding speed selection, and handling are also essential. When you choose a belt from Mirka, you can be confident that you will get the most efficient sanding results without compromising the quality.

1 INCREASE PROFIT

Overall sanding costs can be minimised simply by choosing the most suitable product for each sanding operation. That means:

- Choosing the right type of grit and coating
- Using the optimal grit sequence
- Avoiding sanding with finer grits than necessary

2 OPTIMISING BELT LIFESPAN WITH THE RIGHT APPLICATION

The lifespan of the belt can be further increased by ensuring that the sanding equipment is correct and used properly:

- Choose the right type of sanding machine for each sanding operation
- Adjust the sanding machine correctly
- Ensure the machine is properly maintained
- Check that the dust extraction is adequate

3 HERE TO HELP

A customer producing solid oak wood flooring and using wide belts from our competitors were experiencing random marks in the wood after limited sanding. After several attempts from the current supplier to resolve the issue they decided to call in the wide belt machine repair company who immediately got in contact with Mirka to assist. The marks were caused by hard spots of silicon embedded in random parts of the oak, caused by an unnatural occurrence in the Parenchyma Cells within the oak tree during growth. These hard spots when sanded with standard Aluminium oxide belts cause damage to the belt which then transfers to the oak panel each time the belt passes over it. To resolve the issue, we supplied a close coated Silicon carbide grain belt, which is much harder and capable of sanding through the hard spots without damaging the belt.

Quality Abrasive Belts

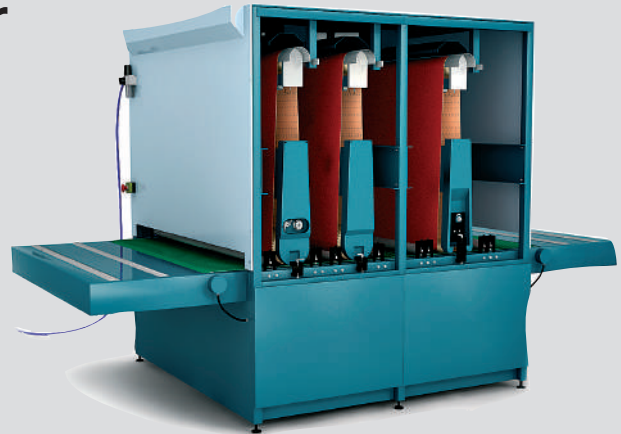

– Choose the right belt for your surface

Achieving the desired final result with any surface treatment is affected by a wide variety of factors. For example, the choice of sanding material plays a vital part in the overall process. By choosing the correct type of sanding material and handling it correctly, you can ensure that you achieve an optimal sanding result, as well as the best possible lifespan for the sanding material itself.

Online Belt Calculator

It is now possible to calculate the price of any narrow or wide belt using the Mirka Belt Calculator available on the website.

Simply select the Abrasive material, grit, width and length of the belt required to get an instant price.

Want to learn more about abrasive belts?

We have a wealth of information to share with you, from the correct storage to trouble-shooting common problems. Our helpful know-how has come direct from our technical experts. If you still require some advice, you can contact our specialists team and somebody will be in touch.

Belts Made To Order

– Choose the right belt for your surface

GRIT SIZE AND SEQUENCE

In general, the first sanding belt is used for stock removal, while the following belts are only used for creating an even surface finish.

Grit size	Use
P24-P80	Coarse sanding, calibration
P100-P320	Medium sanding, wood sanding
P320-P1200	Fine sanding, intermediate sanding

BELT JOINTS

Belt joint performance is a key factor for sanding belts. The joints must be as strong as the actual sanding material and should not be too thick or too thin compared to the sanding material. The belt should also have the right shape and dimension.

TT JOINT

This is a special joint where the tape is applied on the sanding side, making it suited to profile sanding with a sanding pad.

T JOINT

Typically used for small cloth belts that require strength and flexibility, a T-joint is cut through the sanding belt without an overlap and the joint is attached with tape on the reverse side.

TS JOINT

A TS-joint is similar to a T-joint but is different in the way the connecting ends are cut. By using a TS-joint the hinge effect can be avoided. This joint type is most suitable for belts in medium grit sizes and it is most common on cloth-backed belts, although TS-joints can also be found on paper-backed belts.

MADE TO ORDER BELTS

B JOINT

The most common joint for sanding belts with cloth backing, the B-joint is an overlapping joint with compensation on the abrasive side. This means that the joint area is free of abrasive material which allows the cloth to overlap without the joint having to be thicker than the rest of the belt. The B-joint is also suitable for special paper products, such as Mirka's Ultimex.

A JOINT

Mostly used for sanding belts made from paper, an A-joint is an overlapping joint without compensation on the abrasive side, e.g. without interruption in the coating. It produces a uniform sanding belt thickness, even across the joint, and results in an even sanding finish without chatter marks.

ANTISTATIC TREATMENT

The electrostatic charge generated when sanding with belts can generate large quantities of dust. Using belts with an antistatic treatment prevents problems linked to dust and guarantees a better work environment. Reducing the electrostatic charge of sanding machine belts provides a range of benefits.

BENEFITS:

- Dust-free sanding provides better quality finishes.
- The machine remains free of dust, simplifying maintenance.
- Less dust in the work environment, for a more pleasant environment with better air quality.

It is important to note that abrasives can have different levels of antistatic properties. Some products just use an antistatic material as the backer, while others also offer an antistatic bonding system. Dust issues can also be significantly reduced by using an effective dust-extraction system.

MADE TO ORDER BELTS

Abranet® Max

Abranet Max is a universal abrasive with net backing well-suited to many types of sanding, particularly in the wood industry. Thanks to the net backing, it does not clog during sanding of resinous woods or soft materials, and the surface being sanded does not overheat. The extremely strong aluminium oxide grains offer high cutting speeds on the hardest woods. The symmetrical mesh structure allows for an efficient cut and excellent stock removal. The reduced pressure required and the more uniform finish ensure constant quality in the sanding process when using Abranet Max. It offers exceptional durability compared to traditional abrasive belts, which translates into fewer belts required to complete the work, as well as savings in terms of costs and production time. The product is also suitable for applications where water is used for cooling.

RECOMMENDED FOR:

sanding of solid wood, fibreglass, processes requiring high stock removal rates

TECHNICAL SPECIFICATION

Bonding	Resin over resin
Grain	Aluminium oxide
Coating	Closed
Colour	Brown/White
Grit range	P40, P60, P80, P100, P120, P150, P180, P220, P240
Backing	PA net
Formats	Rolls, narrow belts
Available widths	50–300 mm
Available lengths	303–10800 mm

Avomax® Antistatic

Developed for wood sanding applications, Avomax Antistatic's open coating makes it ideal for sanding materials that clog easily. The product is ideal for sanding soft materials and resinous woods such as pine, at the same time guaranteeing a long lifespan and smooth surface finishing. The antistatic paper backing allows for the production of dimensionally accurate and reliable wide belts. Resin over resin bonding and aluminium oxide grains guarantee a very durable product.

RECOMMENDED FOR:

sanding of softwoods on auto-feeding and handheld machines

TECHNICAL SPECIFICATION

Bonding	Resin over resin
Grain	Aluminium oxide
Coating	Open
Colour	Maroon
Grit range	P40, P60, P80, P100, P120, P150, P180, P220, P240, P320
Backing	T-paper/F-paper/Antistatic paper
Formats	Rolls, narrow belts, wide belts
Available widths	30–1400 mm
Available lengths	360–11000 mm

MADE TO ORDER BELTS

Gold Max

Gold Max is a stearate-coated abrasive on paper backing for intermediate and fine sanding applications. The antistatic E-paper gives good durability and stability to the product, ensuring even surface finishing. The heat-treated aluminium oxide enables a high cut rate even on harder paints. The semi-open special coating minimises clogging and increases the product's lifetime. Gold Max is suitable for paint and lacquer sanding.

RECOMMENDED FOR:
sanding of paints on auto-feeding machines

TECHNICAL SPECIFICATION

Bonding	Resin over resin
Grain	Heat-treated aluminium oxide
Coating	Semi-open
Colour	Gold
Grit range	P240, P320, P400, P500, P600, P800
Backing	Antistatic E-paper
Formats	Rolls, narrow belts, wide belts
Available widths	30–1400 mm
Available lengths	360–11000 mm

Hiolit® JCA2A0

Hiolit® JCA2A0 is designed for sanding of soft and hard woods, MDF and soft metals, such as brass and aluminium. The cotton cloth backing makes it tough and ideal for sanding of profiles, seams, edges, joints etc. The semi-open coating, fast cut, long lifespan and high stock removal makes Hiolit® JCA2A0 a truly universal abrasive.

RECOMMENDED FOR:
semi-flexible cloth for sanding of wood or soft materials

TECHNICAL SPECIFICATION

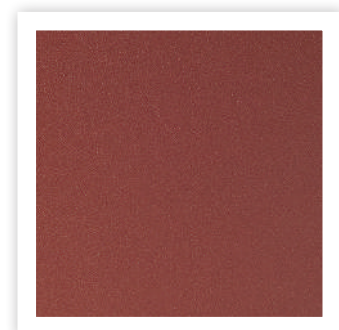

Bonding	Resin over resin
Grain	Aluminium oxide
Coating	Semi-open
Colour	Brown
Grit range	P60, P80, P100, P120, P150, P180, P220, P240, P320, P400
Backing	J-weight cotton cloth

ABRASIVE BELTS MADE TO ORDER • USE THE MIRKA BELT CALCULATOR

MADE TO ORDER BELTS

Hiolit® XO

Hiolit® XO is a semi-open stiff universal abrasive. Its excellent edge wear resistance and durability make it ideal for belt sanding and other machine sanding. In particular, it produces high quality results on challenging materials. Grits from 36–80 are suitable for aggressive sanding operations, such as rust removal, as well as stock removal where large amounts of material need to be removed.

RECOMMENDED FOR:
heavy sanding, stock removal

TECHNICAL SPECIFICATION

Bonding	Resin over resin
Grain	Aluminium oxide
Coating	Semi-open
Colour	Brown
Grit range	P36, P40, P50, P60, P80, P100, P120, P150, P180, P220, P240
Backing	Polyester cloth P36–P80 / X-weight cotton cloth P100–P240
Formats	Discs, narrow belts, wide belts
Available widths	Check widths at https://www.mirka.com/en/know-how/applications/belt-sanding
Available lengths	Check lengths at https://www.mirka.com/en/know-how/applications/belt-sanding

Hiolit® YPZ1A0

A robust and aggressive abrasive thanks to the extremely hard zirconia grains and the tough Y-weight polyester cloth backing. It offers high stock removal rates and the cloth backing is less prone to tearing. It is suitable for both wet and dry applications, and is ideal for heavy sanding and calibration.

RECOMMENDED FOR:
heavy sanding, calibration

TECHNICAL SPECIFICATION

Bonding	Resin over resin
Grain	Zirconia
Coating	Closed
Colour	Blue
Grit range	P24, P36, P40, P60, P80, P100, P120
Backing	Y-weight polyester cloth
Formats	Discs, narrow belts, wide belts
Available widths	Check widths at https://www.mirka.com/en/know-how/applications/belt-sanding
Available lengths	Check lengths at https://www.mirka.com/en/know-how/applications/belt-sanding

ABRASIVE BELTS MADE TO ORDER • USE THE MIRKA BELT CALCULATOR

MADE TO ORDER BELTS

Jepuflex® Antistatic

A high-quality abrasive with a wide range of applications. Ideal for sanding of hardwoods such as beech, birch and oak. The antistatic paper backing allows for the production of dimensionally accurate and reliable wide belts. Resin over resin bonding and aluminium oxide grains guarantee a very durable product. The silicon carbide grain used in the coarsest grits gives the product even greater durability. These qualities, combined with the closed coating, make Jepuflex Antistatic a genuine all-round product that also works well on metal, plastic and paint.

TECHNICAL SPECIFICATION	
Bonding	Resin over resin
Grain	Silicon carbide / Aluminium oxide
Coating	Closed
Colour	Maroon
Grit range	P36, P40, P60, P80, P100, P120, P150, P180, P220, P240, P320, P400
Backing	Antistatic T-paper/F-Paper
Formats	Discs, rolls, narrow belts, wide belts
Available widths	30–1400 mm
Available lengths	360–11000 mm

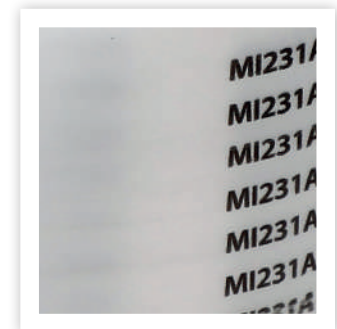

RECOMMENDED FOR:

sanding of hardwoods on auto-feeding and handheld machines

MI231A

Polishing film designed for finishing of glossy/polished surfaces. MI231A is manufactured to the highest quality and accuracy standards using the most technically advanced materials and processes. MI231A has a semi-open distribution of aluminium oxide grains, which resist clogging of the abrasive surface and produces a delicate finish. This polishing film can be used for both wet or dry applications. Available on a 5 mil anti-slip backing.

TECHNICAL SPECIFICATION	
Bonding	Low-VOC resin
Grain	Aluminium oxide
Coating	Semi-open
Colour	White
Grit range	30 μ (P500), 20 μ (P800), 15 μ (P1200), 9 μ (P2500)
Backing	Polyester film
Formats	Roll, narrow belts
Available widths	15–300 mm
Available lengths	250–4500 mm

RECOMMENDED FOR:

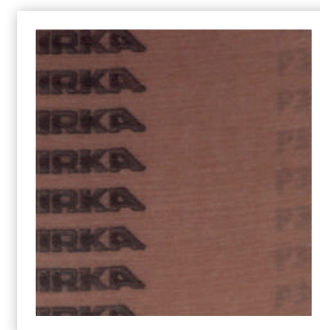

polishing of glossy surfaces before brushing (recommended grits 20 μ and 15 μ) with narrow belts and on auto-feed machines

ABRASIVE BELTS MADE TO ORDER • USE THE MIRKA BELT CALCULATOR

MADE TO ORDER BELTS

MI231C

Film designed for precision sanding of hard surfaces. MI231C is manufactured to the highest quality and accuracy standards using the most technically advanced materials and processes. MI231C features a semi-open distribution of ceramic-coated aluminium oxide grains. Available on a 5 mil anti-slip backing, this film can be used for both wet and dry applications.

RECOMMENDED FOR:

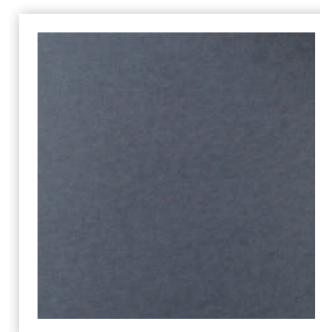

sanding of hard surfaces with narrow belts and on auto-feed machines

TECHNICAL SPECIFICATION

Bonding	Low-VOC resin
Grain	Ceramic-coated aluminium oxide grains
Coating	Semi-open
Colour	Red
Grit range	80µ (P180), 60µ (P220), 30µ (P500), 20µ (P800), 15µ (P1200)
Backing	Polyester film
Formats	Rolls, narrow belts
Available widths	15–300 mm
Available lengths	250–4500 mm

Sica Closed

Designed for sanding of MDF and other materials containing mineral debris, Sica Closed is an antistatic abrasive suitable for materials covered with water-based coatings. It maintains its shape well, and the silicon carbide grains raise the wood fibres less with a finer scratch pattern than products using aluminium oxide grains, for a better final finish after surface treatment.

RECOMMENDED FOR:

sanding of hard surfaces thanks to the silicon carbide grains

TECHNICAL SPECIFICATION

Bonding	Resin over resin/Antistatic
Grain	Silicon carbide
Coating	Closed
Colour	Black
Grit range	P80, P100, P120, P150, P180, P220
Backing	Antistatic F-paper
Formats	Wide belts
Available widths	30–1400 mm
Available lengths	360–11000 mm

ABRASIVE BELTS MADE TO ORDER • USE THE MIRKA BELT CALCULATOR

MADE TO ORDER BELTS

Sica Fine Stearate

Sica Fine Stearate is an antistatic “stearate” product which produces minimal dust load and a high-quality surface finish. It offers excellent results after top coating/lacquering, even minimising product consumption.

RECOMMENDED FOR:
sanding of painted surfaces with narrow or wide belts, with auto-feed machines

TECHNICAL SPECIFICATION

Bonding	Stearate-coated resin over resin/Antistatic
Grain	Silicon carbide
Coating	Semi-open
Colour	Grey
Grit range	P240, P320, P400, P500, P600, P800, P1000, P1200, P1500
Backing	Antistatic E-paper
Formats	Wide belts
Available widths	30–1400 mm
Available lengths	360–11000 mm

Sica Open

Sica Open is the recommended solution for sanding soft, resin-rich wood types. The open coating and completely antistatic backing material and layers limit dust accumulation and prevent clogging, improving the durability of Sica Open. In addition, the silicon carbide grains produce a smoother scratch pattern and a higher surface gloss level than aluminium oxide grains.

RECOMMENDED FOR:
sanding of wood and soft materials with narrow or wide belts

TECHNICAL SPECIFICATION

Bonding	Resin over resin/Antistatic
Grain	Silicon carbide
Coating	Open
Colour	Black
Grit range	P80, P100, P120, P150, P180
Backing	Antistatic F-paper
Formats	Wide belts
Available widths	75–1400 mm
Available lengths	550–10800 mm

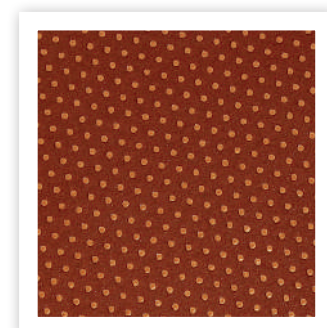

ABRASIVE BELTS MADE TO ORDER • USE THE MIRKA BELT CALCULATOR

MADE TO ORDER BELTS

Ultimax®

Ultimax is the revolutionary abrasive developed by Mirka's labs for sanding with wide belt sanders and vertical sanding machines. It is manufactured using the innovative Mirka Selective Coating® technology, which creates hundreds of perfectly round cavities on the abrasive surface. Ultimax has been designed for industrial sanding of hardwoods, but also offers excellent performance on MDF, chipboard, veneered panels and softer woods.

TECHNICAL SPECIFICATION	
Bonding	Resin over resin
Grain	Aluminium oxide
Coating	Closed coating with Selective Coating® technology
Colour	Brown
Grit range	P40, P60, P80, P100, P120, P150, P180, P220, P240, P320
Backing	Antistatic T-paper/F-Paper
Formats	Discs, narrow belts, wide belts
Available widths	30–1400 mm
Available lengths	360–11000 mm

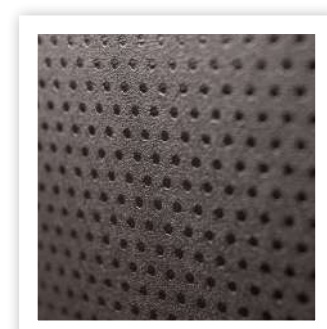

RECOMMENDED FOR:

sanding of various woods, both softwoods and hardwoods, with narrow or wide belts. Grits 240–320 are also suitable for sanding of polyester paints

Ultimax® Black

Ultimax® Black delivers exceptional sanding quality from start to finish. Its patented manufacturing technology and antistatic properties take belt sanding to the next level in longevity and sanding performance thanks to its strength and stability, achieving consistent finishing without the need to adjust machine pressure over time.

TECHNICAL SPECIFICATION	
Bonding	Resin over resin/Antistatic
Grain	Silicon carbide
Coating	Closed coating with Selective Coating® technology
Colour	Black
Grit range	P80 - P1000
Backing	Antistatic T-paper/E-Paper
Formats	narrow belts, wide belts
Available widths	30–1400 mm
Available lengths	360–11000 mm

RECOMMENDED FOR:

a variety of sanding applications: sanding of various woods, both softwoods and hardwoods, melamine and MDF/HDF.

ABRASIVE BELTS MADE TO ORDER • USE THE MIRKA BELT CALCULATOR

MADE TO ORDER BELTS

Unimax®

Unimax is a versatile, fully antistatic abrasive which retains its shape. This reduces dust accumulation and minimises clogging, helping keep the machine clean and increasing the lifespan of the abrasive.

TECHNICAL SPECIFICATION

Bonding	Resin over resin/Antistatic
Grain	Aluminium oxide
Coating	Semi-open
Colour	Black
Grit range	P80, P100, P120, P150, P180, P220
Backing	Antistatic F-paper
Formats	Wide belts
Available widths	30–1400 mm
Available lengths	360–11000 mm

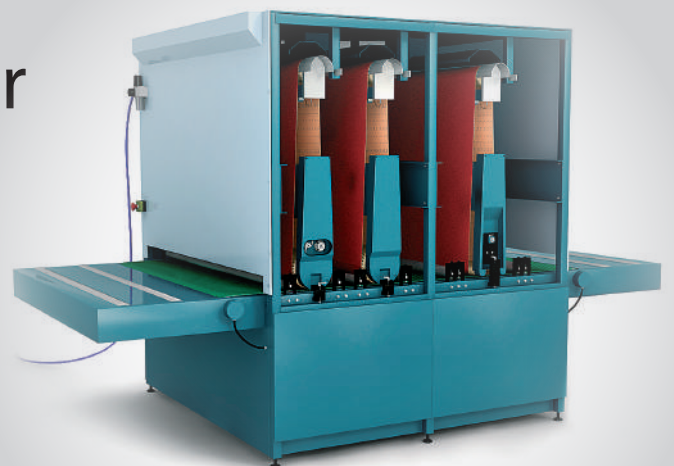

RECOMMENDED FOR:

sanding of various woods, both softwoods and hardwoods; fully antistatic, does not overheat and allows for good dust collection

Online Belt Calculator

It is now possible to calculate the price of any narrow or wide belt using the Mirka Belt Calculator available on the website www.mirka.co.uk/beltcalculator

Simply select the Abrasive material, grit, width and length of the belt required to get an instant price.

Tools & Equipment

Mirka® AIROS Robotic Sanding & Polishing

Mirka® AIROS is the first smart electric sander for industrial robots. Designed by dedicated surface finishing professionals, this automated industrial random orbital sander is easy to integrate and suits the requirements of different manufacturing industries.

For further information, please contact your Technical Sales Representative

Mirka® AIROS - sanders and polishers for industrial robots

Mirka® AIROS

– the first smart sander for industrial robots

The Mirka Automated Industrial Random Orbital Sander, Mirka AIROS is an industry first. It is an electric smart sander for industrial robots, built inside a sturdy yet light aluminium housing, featuring an ISO 9409-1 compatible flange for mechanical robot coupling. It can be adapted to fit all mechanical couplings, offering maximum flexibility. The long-life, brushless 48V motor on the AIROS is extra safe for wet sanding, and it runs on constant, configurable RPM.

1 EASY TO INTEGRATE

Mirka® AIROS is light electric sander that is easy to integrate, requiring lower weight handling capacity and saving electricity compared to traditional pneumatic options. Mirka® AIROS is specifically designed for robotic sanding application and build for continuous usage in robotic environment. Mirka® AIROS has standardized connections ensuring faster and easier installation and maintenance, leading less downtime and improved productivity. Mirka® AIROS is equipped with custom flanges for most robot types to offer maximum flexibility by enabling all mechanical couplings from standard ISO to be customised by means of an adapter.

3 MIRKA ECOSYSTEM

Mirka® AIROS is part of the Mirka ecosystem making it the most dependable solution in the market. Mirka solutions consist of sanding heads, controller unit, abrasives (including custom designed for specific requirements) and naturally knowledge and support of true finishing professional through the whole process. Since Mirka® AIROS sanding head is separate from controller unit, parts are easy to replace decreasing downtime and costs.

2 SMART SANDING SOLUTION WITH EXACT RPM MANAGEMENT

Mirka® AIROS has build-in intelligence that allows two way communication between Mirka® AIROS and control system. Full live control of sanding process ensures the consistent quality and enables controller to learn about application and even improve the quality based on logged data. Additionally smart electric sanding solution enables full control over RPM that can be configured according the needs of different phases of process. Content RPM ensures the consistent quality level that is always reproducible even under higher loads.

4 DUST & WATER PROOF ELECTRIC SANDER

Mirka® AIROS is IP66 classified electric sander suitable for all sanding applications, even wet sanding and safe usage on hazardous materials. Dust and waterproof design of Mirka® AIROS combined with rigid and robust an aluminium housing ensure longer lifetime and safer operations. No lubrication oil needed.

Build Your Own System

- Tailor to your business needs

1 Choose communication integration

- Profinet
- Modbus
- Digital

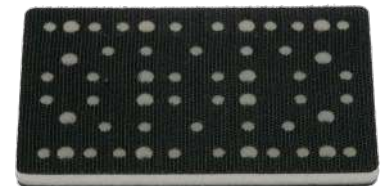

2 Decide your sanding process

By deciding what surface you're looking to sand and what finish you're looking to achieve will help you determine which sanding or polishing head you will require.

3 Accessories selection

The previous step will also help you to identify any accessories you may need, such as: choosing the correct interface pad for sanding curved or profiled surfaces.

4 Abrasive/Polish selection

We have a wide range of sanding and polishing products to choose from depending on your needs. Such as our pioneering net abrasive Abranet for dust free sanding.

Mirka® AutoChanger Redefining Industrial Sanding

In industrial and robotic applications, flawless sanding results are an integral part of the process. This means changing abrasives must be a smooth procedure with no margin for error. Mirka has developed a special AutoChanger system for instant replacement of Mirka abrasive discs in an automated sanding process, to work together with Mirka® AIROS 650S and AIROS 350S sanding heads.

Dedicated to the finish.

MIRKA

NEW

Mirka® AIROS 300P Robotic Polishing Solutions

The Mirka® AIROS 300P is the latest addition to the company's automation range and the first of Mirka's robotic tools to offer rotary polishing. The AIRP (Automated Industrial Rotary Polisher) 300 is a durable polisher with a 77 mm pad and an ISO 9409-1 compatible flange for mechanical robot coupling. It's an appliance that enables efficient precision surface polishing for modern automation solutions.

Dedicated to the finish.

MIRKA**Mirka® DEROS II**

Mirka® DEROS II

The next generation.

The DEROS® II and DEOS® II are not just power tools; they are game changers. It's precision and power like never seen before, featuring new brushless electric motors with as much as a 20% increase in power, providing better efficiency in performing tasks.

Mirka® DEROS – Award winning.

Mirka® LEROS-S

180° flexibility. 100% comfort.

Brushless motor technology - Enables compact design and eliminates the need to change carbon brushes. Helps to maintain a constant speed under load.

180° flexibility in the sanding head - Improves the ergonomics.

5mm random orbit movement - Creates a great surface finish and is much easier to operate compared to rotary sanders.

Dual suction points - Improves the dust extraction.

Only 3.2 kg.

Mirka® LEROS - Pure innovation.

Mirka (UK) Ltd Dust Extractor Disclaimer

It is the responsibility of the purchasing customer to ensure that any dust extractor is suitable for the type of dust being collected. Mirka (UK) Ltd does not and will not recommend a dust extractor to customers. All brochures, catalogues, descriptions and other promotional materials are to be treated as illustrative only and are not intended to amount to advice or recommendation on which a customer should rely. Mirka (UK) Ltd recommends a full risk assessment is carried out by an independent third party professional or specialist to ensure any dust extractor is fit for the purpose intended by a customer before they make a purchase. If the dual vacuum kit is used on an M class dust extractor, the dust extractor cannot be used in applications where M class is required. In no event will Mirka (UK) Ltd be liable for any loss or damage as a result of a customer using a Mirka dust extractor. This disclaimer supplements Mirka (UK) Ltd's Terms of Sale.

MIRKA

Mirka® DEOS II Delta

Closer. For perfection.

A flawless surface from corner to corner. The new DEOS® II Delta 663CV Delta makes it possible, faster and easier than ever before. Sand without strain, even when reaching overhead, as the DEOS® II Delta weighs less than 1 kg. Reach comfortably into tight spaces with a sander that is just 10 cm high. The integrated vibration sensor and Bluetooth connectivity gives you vibration, speed and usage data. Faster and easier sanding is just around the corner.

Mirka® DEOS II Delta 663CV – Flawless from corner to corner.

Mirka® Cordless

Mirka cordless sanders.

As with all Mirka machines, the ergonomic design has been a priority to ensure that the light tool can comfortably be used for long periods without fatigue. These cordless sanders enable a long working time as the battery lasts up to 16 hours in industrial use. The lithium-ion battery charges in only 45 minutes.

Mirka® AROS-B – Battery driven.

MIRKA

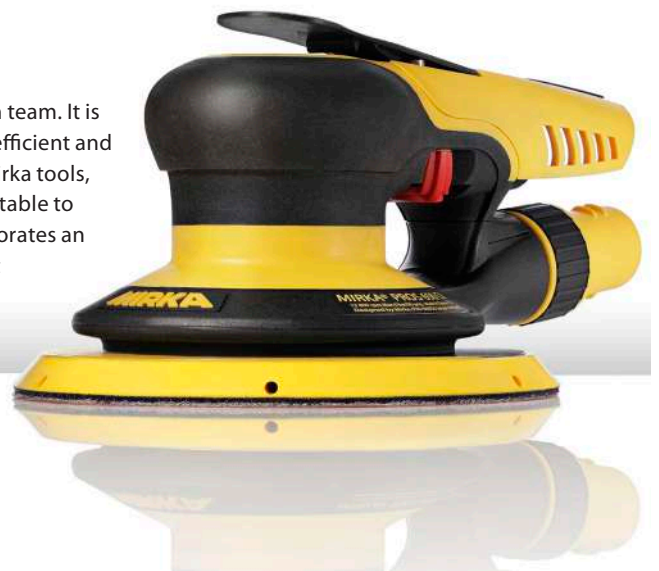

AIR SANDERS

Mirka® PROS

Professional Performance.

Mirka® PROS is developed in-house by the Mirka's industry leading design team. It is packed with clever features and attention to detail which has created an efficient and effective sanding tool that is perfect for professional operators. Like all Mirka tools, Mirka® PROS features optimised ergonomics that not only make it comfortable to grip and user-friendly for long operating periods – the design also incorporates an integrated cover which isolates the operator's hand from the cold air inlet hose fitting and makes changing discs and backing pads easier.

MIRKA

NEW

Mirka® DEXOS

The All New Dust Extractor

Mirka® DEXOS is a completely new dust extractor with a compact, ergonomic, and user-friendly design. Designed from the ground up to be part of Mirka's next generation of power tools, the DEXOS® is an M class extractor with numerous clever touches to make sanding easier and efficient for the operator.

Also available to purchase is a Bluetooth-enabled remote control which senses tool vibrations to start the extractor.

Mirka® Dust Extractors - don't let the dust haunt you.

Mirka (UK) Ltd does not and will not recommend a dust extractor to customers. All brochures, catalogues, descriptions and other promotional materials are to be treated as illustrative only and are not intended to amount to advice or recommendation on which a customer should rely. Mirka (UK) Ltd recommends a full risk assessment is carried out by an independent third party professional or specialist to ensure any dust extractor is fit for the purpose intended by a customer before they make a purchase. If the dual vacuum kit is used on an M class dust extractor, the dust extractor cannot be used in applications where M class is required. In no event will Mirka (UK) Ltd be liable for any loss or damage as a result of a customer using a Mirka dust extractor. This disclaimer supplements Mirka (UK) Ltd's Terms of Sale.

HOSES AND ADAPTORS

Adapter	Description
 8999804111*	1 Hose Ø 27 mm x 0.5 m + Connector. This conductive adapter enables a quick change in-between Mirka power tools. Fix the adapter on each tool and connect/disconnect to/from any Mirka hose assembly with a Mirka branded adapter, both pneumatic: 8992514511, 8992514711.
 8992515811*	2 a Mirka Connector for Air + Electric Hoses. Comes with hose 8992514511 and 8992514711.
 8992515911*	2 b Connector for Air + Electric Hoses with threads. This adapter is close to the dust extractor, where the pneumatic tube/electrical cable comes out. Comes with hose 8992514511 and 8992514711.
 8992515611*	3 Hose adapter Ø 32 mm / 54 mm for Mirka® Dust Extractors. Comes with hose MIN6519411, MIN6519211, 8992514511 and 8992514711. This adapter goes from the hose into the dust extractor.
 8391111111*	5 Adapter Ø 20 mm / 28 mm for Mirka® Hand Sanding Blocks. Enables using the Ø 27 mm hoses (MIN6519411 and MIN6519211) together with the blocks.
 8992515411*	6 Soft Connector Ø 25,4 mm. Delivered together with hose MIN6519411 and MIN6519211. Enables connecting MIN6519411 and MIN6519211 hoses to Mirka Decosander®, Mirka Dust Suction Hood and sanders of other brands. Note! Not suitable for Mirka® CEROS or Mirka® ROS.
 MIE6511111	7 Quick connector Ø 25,4 mm. Delivered together with hose MIN6519411 and MIN6519211. Enables connecting MIN6519411 and MIN6519211 hoses to Mirka DEROS, DEOS, LEROS and Dust Suction Hood. Note! Not suitable for Mirka® CEROS or Mirka® ROS.
 8993022011	8 Hose Swivel Connector Ø 20 mm / 20 mm. Enables connecting two Ø 20 mm hoses. For example: 2 x Ø 20 mm hose x 4 m hose (8391112011).
 8393001511*	10 Adapter Ø 30–48 mm for Dust Extractor. Can be cut to fit dust extractors of other brands.
 8391111211	13 Connector Air Inlet for Hand Sanding Block 20 / 20 mm. When fixed on a Mirka 20 mm dust extraction hose, this new connector enables a quick and smooth change of the hose from one Mirka hand sanding block to another. This connector enables adjusting the airflow.
 MIE6515911	14 Mirka Sleeve for Hose and Cable 3.5 m

Polishing

POLARSHINE® POLISHING PRODUCTS

Polishing guidelines

Use recommended pad and compound combination for best result.

Recommended polishing speed 1,200–2,000 rpm.

Spread compound on a sufficiently small area.

Let the polish and the weight of the buffer do most of the work.

Keep the pads clean, a dirty pad will cause scratches.

To avoid overheating and to achieve an even finish, keep the buffer in motion.

To optimise the lifetime of the pads, clean regularly with water.

Water can be used as a cooler and lubricator during the polishing process.

Keep the compound from drying while polishing; dry compound can burn the surface.

Directions for use

Apply pad

Shake well before use

Apply polish to pad or paint surface

Spread compound and polish at 1,200–2,000 rpm

Clean the surface

Silicone free

Keep out of reach of children

Recommended storage temperature

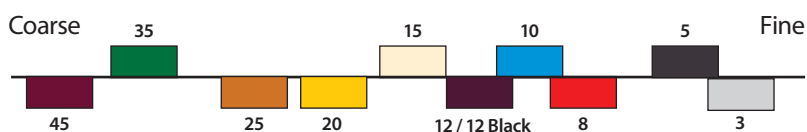

Do not polish in direct sunlight

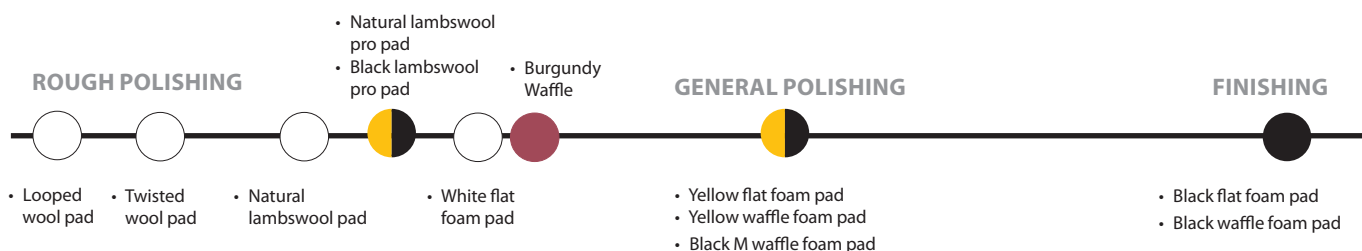

Keep from freezing

Compound grades

Polishing pad types

MIRKA

Cordless is more

Mirka cordless tools are light and ergonomic, with optimal torque and speed thanks to powerful brushless motors. Energy-efficient and quick-charging batteries make the tools economic to use.

With smart Bluetooth technology and an integrated vibration sensor you can monitor vibration levels while sanding. Thanks to rpm range management and auto-stop functions (in-app purchases), you can standardise your spot repair process and achieve the best results every time.

RESIN SURFACE PROCESS

Use following grits of Abranet® ACE (Wipe surface between grits).

Use following grits of Abralon® J3 (damp).

Use following version of Polarshine® 10 with Lambs Wool Pro pad.

PROCESS CHARTS

SOLID SURFACE PROCESS

MATT FINISH

Use following grits of Abranet® Ace. Finish with Abralon® (damp).

SATIN FINISH

Use following grits of Abranet® Ace. Finish with Abralon (damp).

GLOSSY FINISH

Use following grits of Abranet® Ace. Finish with Abralon (damp).

HIGH GLOSS FINISH

Use following grits of Abranet® Ace. Continue with Abralon® (damp) and finish with Polarshine® 10 and lambswool pad.

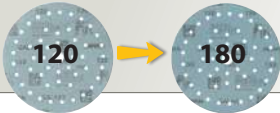

EPOXY RIVER TABLE

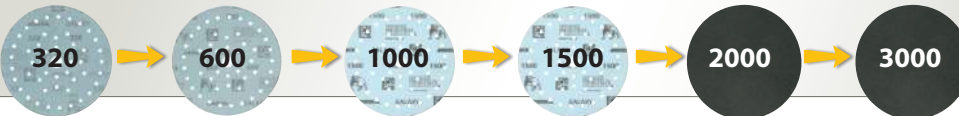

STEP 1

Sand the whole table with Mirka Galaxy.

STEP 2

Sand the resin only using Galaxy, followed by Abralon® J3 77mm (damp).

STEP 3

Polish the resin with 77mm yellow waffle pad and Polarshine® 10. Apply a coating to the whole surface to finish.

PROCESS CHARTS

UPVC Window & Door Frame Scratch removal process

STEP 1	 <p>Abranet 32mm, Grit 240-320</p>
STEP 2	 <p>Abranet 32mm, Grit 500</p>
STEP 3	 <p>Abranet 32mm, Grit 800</p>
STEP 4	 <p>Abralon 32mm, Grit 1000</p>
STEP 5	 <p>Abralon 32mm, Grit 2000</p>
STEP 6	 <p>Abralon 32mm, Grit 4000</p>

STEP 1

- After cleaning the surface and identifying the defect, start sanding with the Mirka® AOS-B sander using Abranet® 240 or 320 grit.

STEP 2

- Continue sanding with Abranet® 500 grit, once the scratch has been removed as identified in the previous step.

STEP 3

- Continue sanding with Abranet® 800 grit to improve surface condition.

STEP 4

- Clean and dampen surface before sanding with Abralon® 1000 grit.

STEP 5

- Continue to sand (damp) with Abralon® 2000 grit to improve surface condition.

STEP 6

- Finally, sand with Abralon® 4000 grit (damp) to match existing finish.

Tips:

- Clean the surface between every sanding step to get a better visibility of the sanding progress.
- Expand the sanded surface area after each sanding step between 5-10mm.
- Continue with Abralon® 4000 grit until the desired surface finish is achieved.

Always use the correct PPE when undertaking any sanding operation, please refer to the TDS for all information. Always use dust extraction when undertaking any sanding operation.

mirka.co.uk

Robotic Solutions Specifications

The control electronics are separate from the tool and can be installed in a cabinet or other enclosure. The electronics include:

- Circuit board with speed controller and relay
- 48 VDC power supply compatible with 90 – 264 VAC
- Modbus RTU port for RS-485 serial communication
- Profinet - Modbus gateway (optional)

Mirka (UK) Ltd Dust Extractor Disclaimer

It is the responsibility of the purchasing customer to ensure that any dust extractor is suitable for the type of dust being collected. Mirka (UK) Ltd does not and will not recommend a dust extractor to customers. All brochures, catalogues, descriptions and other promotional materials are to be treated as illustrative only and are not intended to amount to advice or recommendation on which a customer should rely. Mirka (UK) Ltd recommends a full risk assessment is carried out by an independent third party professional or specialist to ensure any dust extractor is fit for the purpose intended by a customer before they make a purchase. If the dual vacuum kit is used on an M class dust extractor, the dust extractor cannot be used in applications where M class is required. In no event will Mirka (UK) Ltd be liable for any loss or damage as a result of a customer using a Mirka dust extractor. This disclaimer supplements Mirka (UK) Ltd's Terms of Sale.

Thread	M14
Noise level	84 dBa
Vibration	3.0 m/s ²
Weight	1.9 kg

TERMS AND CONDITIONS

Prices and descriptions are correct at the time of publication, however these may be reviewed at any time and are subject to change without notice. Mirka reserves the right to change the status of products from/to standard stock without notice. All prices are exclusive of VAT and are subject to changes external to Mirka's control. E&OE. Due to the printing processes used the colours shown may vary from the actual item. Minimum order is £350 + VAT. Delivery via distribution only. Standard Terms of Sale apply unless otherwise stated.

This document is the property of Mirka and may not be reproduced in whole or in part without its consent. Prices and descriptions are given for the sole purpose of giving an approximate idea of Mirka's range of products and are provided "as is" for this purpose. Neither prices and descriptions nor this document shall constitute an offer to supply products. Particular products and/or sales channels may, at Mirka's election, be reserved to Mirka for the purposes of sale to particular customers. In addition or alternatively, particular products may be subject to resale terms set forth by Mirka from time to time including, without limitation, where products are contained within a kit, that the individual products within that kit cannot be resold separately.

Items in blue are only available from stock in Finland and are subject to a lead time of 5 – 7 days.

Terms of Sale

Mirka (UK) Ltd's terms of sale (together with its online reseller policy, dust extractor disclaimer and any other policies from time to time, which appear or will appear on its website and which supplement its terms of sale) apply to all sales of goods by Mirka (UK) Ltd. These documents can be viewed at www.mirka.co.uk under the "Company - Policies & Certificates" section and they form part of the contract for the sale of any goods by Mirka (UK) Ltd. An acceptance of a Mirka (UK) Ltd quotation or an order to Mirka (UK) Ltd is an offer to purchase goods on Mirka (UK) Ltd's terms of sale. No contract for the sale of any goods will come into existence until Mirka (UK) Ltd has issued a written acknowledgment or confirmation of order. Such terms of sale provide, without limitation, for the following and your particular attention is drawn to the following:

1. Unless otherwise agreed in writing, all prices given are on an ex works basis from Mirka (UK) Ltd's premises. Where goods are supplied for export from the United Kingdom, unless otherwise agreed in writing, goods shall be delivered fob the air or sea port of shipment.
2. By way of a minimum purchase amount, the buyer shall purchase goods from Mirka (UK) Ltd of not less than any quantity set by Mirka (UK) Ltd.
3. Time for payment shall be of the essence.
4. Any dates quoted for delivery of goods are approximate only and Mirka (UK) Ltd shall not be liable for any delay in delivery howsoever caused. Time of delivery shall not be of the essence.
5. Risk of damage to or loss of goods shall pass to the buyer on delivery.
6. Property in goods shall not pass to the buyer until Mirka (UK) Ltd has received cleared payment in full for the price of those goods and all other goods agreed to be sold for which payment is due.
7. Except in respect of any matter in respect of which it would be unlawful for it to exclude or limit its liability, the entire liability of Mirka (UK) Ltd under or in connection with any contract for the sale of goods shall not exceed the price of goods supplied.
8. The terms of each contract for the sale of goods shall be governed by the laws of England and the buyer agrees to submit to the exclusive jurisdiction of the English courts.
